

PROSPER AWUNI

Senior Cyber Security Engineer | Azure Security | Hybrid Infrastructure | Prevent and Protect

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of experience strengthening security across hybrid infrastructure and Azure cloud environments. I work within the prevent and protect pillars of the cyber security function, implementing and continuously improving security controls that reduce risk and enhance organisational resilience. My expertise spans Microsoft Defender suite deployment across large user estates, Azure Active Directory (now Microsoft Entra ID) identity security, endpoint protection, Security Information and Event Management (SIEM), and vulnerability management. I am highly effective working fully remotely, having delivered enterprise-scale security programmes with a distributed team, and I bring the communication, documentation, and stakeholder management skills needed to operate autonomously while contributing to a collaborative cyber function.

CORE SKILLS AND TECHNICAL STACK

- **Azure Security and Hybrid Infrastructure:** Microsoft Entra ID, Azure Active Directory, Conditional Access, Azure cloud security controls, hybrid identity management
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender - deployed across 8,000 users
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, NG-SIEM, Insight, Discover) - Expert
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike NG-SIEM, SOAR playbook engineering
- **Identity and Access Management (IAM) / Multi-Factor Authentication (MFA) / Single Sign-On (SSO):** Microsoft Entra ID, Conditional Access, MFA, SSO
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Privileged Access Management (PAM):** BeyondTrust
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Email Security:** Mimecast, Check Point Harmony
- **PowerShell Scripting and Security Automation**
- **Frameworks:** NIST Cybersecurity Framework (CSF), NIST 800-61, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) - Senior Cyber Security Analyst / Engineer March 2023 - Present
Users of the Arts and London (UAL) - Senior Cyber Security Analyst / Engineer March 2023 - Present
users, implementing and continuously improving security controls across cloud, endpoint, and network layers.

- Manage and optimise the Microsoft Defender suite including Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender, driving comprehensive threat detection and automated response across the hybrid estate.
- Administer Microsoft Entra ID and Azure Active Directory security, including Conditional Access policy design, MFA enforcement, SSO configuration, and privileged identity management to enforce zero-trust principles across cloud and on-premises systems.
- Operate CrowdStrike Falcon EDR at an expert level, managing the Prevent, Insight, Discover, and NG-SIEM modules with continuous tuning and threat hunting to detect and respond to advanced threats.
- Manage Microsoft Sentinel SIEM with custom Kusto Query Language (KQL) detection rules and Security Orchestration, Automation and Response (SOAR) playbooks, enabling rapid automated response to security events across the hybrid infrastructure.

- Lead vulnerability management programmes using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), including control validation, risk prioritisation, and remediation tracking across cloud and on-premises assets.
- Oversee Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) across Windows, macOS, iOS, and Android devices, maintaining compliance and security baselines throughout the hybrid device estate.
- Administer BeyondTrust Privileged Access Management (PAM), enforcing least-privilege access and securing administrative access to critical infrastructure.
- Manage Mimecast and Check Point Harmony email security controls to protect against phishing, malware, and data exfiltration across the hybrid communications infrastructure.
- Lead incident response activities aligned to NIST 800-61, coordinating containment, eradication, and recovery, and producing post-incident reports for senior leadership.
- Use PowerShell to automate routine security tasks including policy enforcement, log collection, and reporting, improving operational efficiency within the security team.

University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity
 Implemented end-to-end security operations across SIEM, EDR, and PAM management and identity platforms within a hybrid Azure and on-premises infrastructure environment. *March 2022 - March 2025*

- Designed and maintained Microsoft Entra ID Conditional Access policies, MFA, and SSO configurations to strengthen identity security across the hybrid estate.
- Managed Microsoft Intune MDM/MAM policies, ensuring device compliance, application control, and endpoint security across a diverse hybrid device fleet.
- Conducted vulnerability scanning and risk assessments using Nessus and AppCheck, reporting findings and tracking remediation through to closure.
- Supported incident response and forensic investigations, applying MITRE ATT&CK threat modelling to identify attacker behaviour and guide remediation.
- Contributed to the deployment of Microsoft Defender suite across the full user estate, improving endpoint and identity threat detection coverage.

HGX Solutions Ltd (SaaS/FinTech) - IT Engineer, Security, Quality and Infrastructure
 Implemented end-to-end security controls across SaaS applications and cloud-hosted infrastructure, maintaining security baselines for a distributed workforce. *February 2021 - March 2022*

- Configured MFA and SSO for cloud-hosted SaaS applications, reducing credential-based attack risk in a FinTech environment.
- Monitored security events, managed vulnerability remediation, and maintained cloud infrastructure security in line with compliance and contractual requirements.

KEY ACHIEVEMENTS

- Led the full deployment of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across an 8,000-user hybrid estate, delivering comprehensive endpoint and identity threat detection and response capability.
- Designed and implemented Microsoft Sentinel Security Information and Event Management (SIEM) with custom Kusto Query Language (KQL) detection rules and Security Orchestration, Automation and Response (SOAR) automation, materially reducing mean time to detect and respond to security incidents.
- Expert deployment of CrowdStrike Falcon EDR across the full enterprise estate, establishing mature threat hunting and detection engineering workflows.
- Implemented BeyondTrust Privileged Access Management (PAM) across critical systems, eliminating uncontrolled privileged access and achieving measurable risk reduction.
- Achieved and maintained Cyber Essentials Plus certification through robust control implementation and audit readiness across the hybrid environment.
- Automated security operational workflows using PowerShell, freeing engineering capacity for proactive security improvement projects.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
