

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | Security Information and Event Management (SIEM) | Hybrid, London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience implementing and maintaining enterprise-grade security controls across complex infrastructure environments. I bring hands-on expertise in CrowdStrike Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), Identity and Access Management (IAM), Privileged Access Management (PAM), Mobile Device Management (MDM), and vulnerability management. In my current role at University of the Arts London (UAL), I have led the deployment and operational management of security tooling protecting over 8,000 users, driven alert triage and incident response, and delivered security awareness programmes across the organisation. I am a Certified Information Systems Security Professional (CISSP) and hold a strong track record in managing Web Application Firewall (WAF), email security gateways, Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Intrusion Detection and Prevention Systems (IDS/IPS). I am seeking a hybrid senior engineering role within a focused, high-performing security team where I can contribute technical depth and operational discipline to protect critical business infrastructure.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Security Information and Event Management (SIEM):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM), Microsoft Sentinel, Microsoft Defender for Endpoint (MDE)
- **Email and Web Security:** Mimecast email security gateway, Web Application Firewall (WAF), DDoS mitigation
- **Identity and Access Management (IAM) / Privileged Access Management (PAM):** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA, SSO, BeyondTrust PAM
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune, Tanium
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Firewalls and Network Security:** Check Point Harmony, Intrusion Detection and Prevention Systems (IDS/IPS), network segmentation
- **Scripting and Automation:** PowerShell, Security Orchestration Automation and Response (SOAR) playbooks, KQL (Kusto Query Language)
- **Frameworks:** NIST Cybersecurity Framework (CSF), MITRE ATT&CK, CIS Controls, Cyber Essentials Plus, ISO 27001, NIST 800-61 Incident Response
- **Certifications:** Certified Information Systems Security Professional (CISSP), CompTIA Security+, Microsoft Certified Solutions Associate (MCSA), CompTIA A+

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst (Engineer)

March 2025 - Present

- Lead engineering and operational management of the CrowdStrike Falcon EDR platform across 8,000+ endpoints, including policy configuration, threat hunting using CrowdStrike Insight, and detection tuning to reduce false positives.
- Manage SIEM alerting and SOAR automation workflows in Microsoft Sentinel using KQL-based detection rules and playbooks, reducing mean time to respond to security incidents.
- Oversee WAF and DDoS mitigation configurations, web and email security gateway policies (Mimecast), and firewall rule reviews for Check Point Harmony environments.
- Administer MFA, SSO, and Conditional Access policies within Microsoft Entra ID, ensuring Zero Trust principles are applied across the identity perimeter.

- Manage MDM and MAM controls via Microsoft Intune for mobile and endpoint device compliance across staff and student populations.
- Execute vulnerability management cycles using Tenable.io and AppCheck, prioritising and tracking remediation of findings in collaboration with infrastructure teams.
- Conduct IDS/IPS monitoring and PAM administration through BeyondTrust, ensuring privileged account governance and audit trail integrity.
- Deliver security awareness training and phishing simulation campaigns to raise the organisational security culture across faculties and professional services.
- Respond to and lead investigations into security incidents following NIST 800-61 incident response methodology, using MITRE ATT&CK for threat classification and root cause analysis.
- Contribute to ad-hoc security projects including penetration test remediation tracking and security control uplift initiatives.

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Performed alert triage and incident response across SIEM and EDR platforms, investigating and resolving security events in a timely manner to minimise business impact.
- Administered Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across the enterprise environment.
- Supported deployment and management of CrowdStrike Falcon Prevent across endpoint infrastructure, managing agent policies and exclusions.
- Managed BeyondTrust PAM platform, administering privileged session policies, account onboarding, and audit reporting.
- Contributed to vulnerability scanning and remediation cycles using Nessus and AppCheck, liaising with infrastructure and application teams to prioritise and close findings.
- Authored PowerShell scripts to automate security operations tasks including log collection, account auditing, and endpoint compliance checks.
- Supported the rollout and management of Microsoft Intune for mobile device management, configuring compliance policies and conditional access integration.
- Maintained and reviewed firewall rules and IDS/IPS signatures in line with security policy and change management processes.

IT Engineer, Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security engineering across the company's SaaS infrastructure, including endpoint hardening, network security controls, and access management.
- Implemented MFA and SSO policies to secure internal and customer-facing systems, reducing credential-based attack risk.
- Supported vulnerability assessments and remediation activities, working with development and infrastructure teams to close identified security gaps.
- Managed IT quality assurance processes and security compliance activities aligned to ISO 27001 and internal security standards.
- Administered MDM policies for company devices and configured security baselines for Windows endpoints.

KEY ACHIEVEMENTS

- Successfully led CrowdStrike Falcon EDR deployment and ongoing management across an estate of 8,000+ users at UAL, improving endpoint visibility and threat detection capability.
- Reduced false-positive alert volumes by refining CrowdStrike and Microsoft Sentinel detection rules, improving analyst efficiency and reducing investigation fatigue.
- Designed and implemented Conditional Access and Entra ID MFA policies, significantly reducing the risk of unauthorised account access across UAL's identity estate.
- Delivered enterprise-wide security awareness training programme resulting in measurable reduction in phishing click rates across UAL staff populations.
- Achieved and maintained Cyber Essentials Plus certification for UAL, ensuring compliance with UK government baseline security standards.

- Automated routine security operations tasks through PowerShell and SOAR playbooks, reducing manual analyst effort and improving response consistency.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
