

PROSPER AWUNI

Senior Cyber Security Engineer | Security Information and Event Management (SIEM) | Endpoint Detection and Response (EDR) | Cloud Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience designing, implementing, and optimising enterprise security platforms. I have deep expertise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR) via CrowdStrike Falcon, Privileged Access Management (PAM), vulnerability management, and incident response. I have led the deployment of Microsoft Sentinel across an eight-thousand-user environment, built detection content aligned to the MITRE ATT&CK framework, and driven security maturity across multi-cloud and hybrid infrastructure. I thrive in high-impact, close-knit security teams where I can bring rigorous technical discipline to threat detection, SIEM engineering, and the full incident response lifecycle.

CORE SKILLS AND TECHNICAL STACK

- **SIEM / SOAR:** Microsoft Sentinel (Kusto Query Language (KQL)), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM) / LogScale, SOAR automation and playbook development
- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (Prevent, Insight, Discover, EDR) - expert-level; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender XDR
- **Identity and Access Management (IAM) / MFA / SSO:** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access Policies, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune, Mobile Device Management (MDM), Mobile Application Management (MAM)
- **Email and Web Security:** Mimecast email security gateway; web proxy and Secure Web Gateway controls
- **Privileged Access Management (PAM):** BeyondTrust PAM
- **Firewalls and Network Security:** Check Point Harmony firewall; IDS/IPS configuration and monitoring; WAF/DDoS awareness
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; vulnerability scanning, remediation tracking
- **Incident Response:** NIST 800-61 Incident Response lifecycle, MITRE ATT&CK framework, threat hunting, forensic triage
- **Scripting and Automation:** PowerShell, KQL; SOAR automation workflows
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus (CE+)

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer – University of the Arts London (UAL)

March 2025 – Present

- Own and optimise the enterprise SIEM/SOAR platform (Microsoft Sentinel with KQL-based detection rules), managing alert triage, correlation rules, and automated playbooks across an eight-thousand-user estate.
- Administer the CrowdStrike Falcon suite (EDR/Prevent/Insight/Discover/NG-SIEM) at expert level, including policy configuration, threat-hunting queries, and rapid incident containment.
- Lead security incident response end-to-end under the NIST 800-61 framework, coordinating investigation, containment, eradication, and post-incident review.
- Manage Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender XDR to protect the hybrid Microsoft cloud estate.
- Administer BeyondTrust Privileged Access Management (PAM) controls, enforcing least-privilege access across all administrative tiers.

- Conduct vulnerability scans and drive remediation cycles using Tenable.io, Pentera BAS, AppCheck, and Nessus; prioritise findings by risk using CVSS scoring.
- Maintain and configure Microsoft Entra ID / Azure AD Conditional Access policies, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) for the full user population.
- Configure and maintain Mimecast email security gateway for inbound/outbound threat prevention, including anti-phishing, anti-spoofing, and URL rewriting policies.
- Manage Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies, ensuring endpoint compliance across Windows, macOS, iOS, and Android.
- Build and maintain detection engineering content aligned to the MITRE ATT&CK framework, reducing false-positive alert volume and improving SOC analyst efficiency.
- Produce management-level security reporting, KPIs, and risk dashboards for the IT Security leadership team.

Cyber Security Analyst, Cyber Security and Identity – University of the Arts London (UAL) *March 2022 – March 2025*

- Delivered alert triage, threat hunting, and incident response as a core SOC analyst, monitoring SIEM alerts from Microsoft Sentinel and CrowdStrike NG-SIEM.
- Deployed and maintained Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the eight-thousand-user Microsoft 365 environment.
- Configured Conditional Access policies, MFA enforcement, and SSO integrations via Azure Active Directory (Azure AD) / Microsoft Entra ID.
- Supported vulnerability management programme using Tenable.io and Nessus; tracked and escalated remediation actions for high and critical findings.
- Maintained Mimecast email security gateway configurations including policy rules, threat intelligence feeds, and block lists.
- Managed Microsoft Intune MDM/MAM profiles, device compliance baselines, and application deployment policies.
- Contributed to security awareness training campaigns and phishing simulations to reduce human-factor risk across the institution.
- Assisted in the implementation and ongoing configuration of BeyondTrust PAM for privileged account lifecycle management.
- Participated in Check Point Harmony firewall policy reviews and IDS/IPS alert monitoring to maintain network security posture.
- Supported internal security audits aligned to Cyber Essentials Plus (CE+), ISO 27001, and NIST Cybersecurity Framework (CSF) controls.

IT Engineer: Security, Quality and Infrastructure – HICX Solutions Ltd (Software as a Service / FinTech)

February 2021 – March 2022

- Administered endpoint security tooling and supported vulnerability scanning and patch management across a cloud-first SaaS infrastructure.
- Configured identity management controls including Azure AD, MFA, and SSO for remote-first staff.
- Managed MDM and device enrolment policies for endpoints, supporting compliance and security posture requirements.
- Monitored security alerts and escalated incidents in line with defined incident response procedures.
- Contributed to internal security quality processes, ensuring IT infrastructure met ISO 27001-aligned controls.
- Supported user onboarding/offboarding processes, access provisioning, and Privileged Access Management (PAM) procedures.

KEY ACHIEVEMENTS

- Deployed Microsoft Sentinel as the primary SIEM/SOAR platform across an eight-thousand-user organisation, including log onboarding, KQL detection rules, and automated playbooks that reduced mean time to respond (MTTR) by over 40%.
- Led the CrowdStrike Falcon EDR deployment and optimisation at expert level, achieving full endpoint visibility and enabling proactive threat hunting using Falcon Insight and Discover.
- Implemented BeyondTrust PAM controls covering all privileged accounts, eliminating unmanaged admin credential risk across on-premises and cloud environments.

- Built a Pentera Breach and Attack Simulation (BAS) programme to continuously validate security controls, providing evidence-based prioritisation of remediation effort.
- Drove the organisation to Cyber Essentials Plus (CE+) certification, strengthening patch management, boundary firewall controls, and secure configuration standards.
- Developed a detection engineering library mapped to MITRE ATT&CK, enabling the SOC team to identify Tactics, Techniques and Procedures (TTPs) across endpoint, identity, and cloud telemetry.

EDUCATION

- Master of Science (M.Sc.) Environmental and Resource Engineering
- Bachelor of Science (B.Sc.) Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
