

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | Cloud and Identity Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience protecting enterprise environments through expert use of CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, email and web security gateways, identity and access management, vulnerability management, and Privileged Access Management (PAM). I have operated as a senior practitioner within a lean IT security team, managing the full security technology stack from alert triage and incident response through to firewall policy, Mobile Device Management (MDM) and security awareness training. I bring a hands-on, engineering-first approach to building and maintaining robust security controls aligned to industry frameworks including NIST and MITRE ATT&CK.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, Next-Generation SIEM (NG-SIEM)) - expert level
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel with Kusto Query Language (KQL); CrowdStrike Falcon NG-SIEM / LogScale; SOAR playbook development and alert automation
- **Identity and Access Management (IAM) / Multi-Factor Authentication (MFA) / Single Sign-On (SSO):** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access, MFA enforcement, SSO configuration
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune; policy configuration for Windows, macOS, iOS, and Android
- **Email Security Gateway:** Mimecast; inbound/outbound filtering, anti-phishing, anti-spoofing, URL rewriting
- **Privileged Access Management (PAM):** BeyondTrust PAM
- **Firewalls / IDS/IPS / WAF:** Check Point Harmony firewall; IDS/IPS policy management; Web Application Firewall (WAF) and DDoS protection awareness
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; scan scheduling, CVSS-based prioritisation, remediation tracking
- **Incident Response:** NIST 800-61 lifecycle; MITRE ATT&CK mapping; threat hunting; digital forensic triage
- **Scripting and Automation:** PowerShell scripting; KQL; SOAR workflow automation
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus (CE+), MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer – University of the Arts London (UAL)

March 2025 – Present

- Serve as lead security engineer within a focused team, managing the end-to-end security technology stack for an eight-thousand-user hybrid estate.
- Administer and optimise CrowdStrike Falcon EDR (Prevent, Insight, Discover, NG-SIEM) at expert level, covering policy management, sensor deployment, threat-hunting query development, and incident-driven containment actions.
- Own the Microsoft Sentinel SIEM/SOAR platform, maintaining KQL-based detection rules, alert correlation logic, and automated response playbooks for continuous monitoring and alert triage.
- Manage Mimecast email security gateway, including inbound/outbound filtering rules, anti-phishing policies, attachment sandboxing, and URL rewriting to protect against email-based threats.
- Administer Microsoft Entra ID / Azure Active Directory (Azure AD), enforcing Conditional Access, MFA, and SSO across all user accounts and integrated applications.

- Configure and maintain Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies for endpoint compliance and data protection.
- Manage BeyondTrust Privileged Access Management (PAM) controls to enforce least-privilege principles and audit privileged session activity.
- Lead security incident response from detection through to post-incident review under the NIST 800-61 framework, coordinating cross-functional containment and recovery actions.
- Manage vulnerability scanning and remediation cycles using Tenable.io, Pentra BAS, AppCheck, and Nessus, delivering monthly reports to IT security leadership.
- Oversee Check Point Harmony firewall policy management and IDS/IPS alert monitoring to maintain network perimeter security.
- Design and deliver security awareness training and phishing simulation campaigns across the organisation to reduce human-factor risk exposure.
- Produce security KPIs, dashboards, and risk reports for the IT Security Officer and executive stakeholders.

Cyber Security Analyst, Cyber Security and Identity – University of the Arts London (UAL) *March 2022 – March 2025*

- Performed alert triage, threat hunting, and incident response using Microsoft Sentinel and CrowdStrike Falcon NG-SIEM across the UAL hybrid environment.
- Deployed and maintained Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) to provide XDR coverage across endpoints and on-premises identity infrastructure.
- Configured Azure Active Directory (Azure AD) Conditional Access policies, MFA, and SSO integrations for a diverse and remote-first user population.
- Managed Mimecast email gateway configurations, responding to email-based threat campaigns and tuning detection rules to reduce false positives.
- Administered Microsoft Intune MDM/MAM profiles, device enrolment workflows, and application deployment policies ensuring endpoint compliance.
- Ran vulnerability management scans using Tenable.io and Nessus; tracked remediation of critical and high-severity findings and reported progress to security management.
- Delivered phishing simulation campaigns and security awareness training to staff across the institution.
- Participated in internal audits aligned to ISO 27001, Cyber Essentials Plus (CE+), and NIST Cybersecurity Framework (CSF).
- Assisted in the implementation of BeyondTrust PAM, including onboarding of privileged accounts and configuration of session recording controls.

IT Engineer: Security, Quality and Infrastructure – HICX Solutions Ltd (Software as a Service / FinTech)

February 2021 – March 2022

- Managed endpoint security tooling, MDM configuration, and patch management across a cloud-first remote-work SaaS infrastructure.
- Configured Azure Active Directory (Azure AD), MFA, and SSO for remote staff, ensuring secure access to corporate applications and data.
- Monitored security alerts and escalated incidents according to defined response procedures, contributing to incident triage and reporting.
- Supported vulnerability scanning and ensured IT infrastructure met ISO 27001-aligned security quality controls.
- Administered Privileged Access Management (PAM) procedures for onboarding and offboarding of privileged accounts.

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon EDR across the full eight-thousand-user estate at expert level, delivering complete endpoint visibility and enabling advanced threat hunting using Falcon Insight and Discover modules.
- Implemented Microsoft Sentinel as the enterprise SIEM/SOAR platform, onboarding all key log sources, authoring KQL detection rules aligned to MITRE ATT&CK, and deploying automated playbooks that reduced mean time to respond (MTTR) by over 40%.
- Configured and maintained Mimecast email security gateway, preventing thousands of phishing, Business Email Compromise (BEC), and malware delivery attempts per month.

- Built a detection engineering library mapped to MITRE ATT&CK Tactics, Techniques and Procedures (TTPs), enabling the security team to detect adversary activity across endpoint, identity, and cloud telemetry.
- Implemented BeyondTrust PAM controls covering all privileged accounts, eliminating unmanaged administrative credential risk across on-premises and cloud environments.
- Achieved Cyber Essentials Plus (CE+) certification by driving improvements to patch management, boundary firewall controls, access control, and secure configuration practices.

EDUCATION

- Master of Science (M.Sc.) Environmental and Resource Engineering
- Bachelor of Science (B.Sc.) Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
