

PROSPER AWUNI

Senior Security Operations Centre (SOC) Analyst | Cloud Security and Detection Engineering

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Security Operations Centre Analyst with over five years of experience in cloud security, detection engineering, threat hunting, and incident leadership across complex enterprise environments. I combine deep technical expertise in Security Information and Event Management (SIEM) platforms, endpoint detection and response (EDR) tooling, and Security Orchestration Automation and Response (SOAR) automation to deliver proactive, intelligence-led defence. At the University of the Arts London, I have driven significant improvements in detection coverage, threat hunting maturity, and incident response velocity, operating at the senior technical level rather than in a traditional alert-handling capacity. I am comfortable owning detection-as-code pipelines, leading cross-functional incident response, and building automation that measurably reduces analyst toil and dwell time.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and Detection Engineering:** CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Microsoft Sentinel, Kusto Query Language (KQL), detection-as-code, custom analytics rule development, alert tuning and noise reduction
- **Threat Hunting:** Intelligence-led hypothesis-driven hunting, MITRE ATT&CK framework mapping, behavioural analytics, lateral movement and persistence detection
- **Incident Leadership:** End-to-end incident response following NIST 800-61, triage, containment, eradication, post-incident review and lessons-learned reporting
- **Cloud Security:** Microsoft Azure, Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), cloud logging and telemetry analysis
- **SOAR and Automation:** SOAR playbook development and orchestration, PowerShell scripting, automated alert enrichment and response
- **Endpoint and Identity Security:** CrowdStrike Falcon EDR, Prevent, Insight and Discover; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Vulnerability Management:** Pentera breach and attack simulation (BAS), Tenable.io, AppCheck, Nessus
- **Privileged Access Management (PAM):** BeyondTrust PAM administration
- **Email and Endpoint Management:** Mimecast, Tanium, Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM)
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Certifications:** CISSP, CompTIA Security+, Microsoft Certified Solutions Associate (MCSA), CompTIA A+

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

Senior Cyber Security Analyst / Engineer

March 2025 - Present

- Lead detection engineering across CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, authoring and continuously improving detection rules aligned to the MITRE ATT&CK framework to reduce mean time to detect (MTTD).
- Conduct proactive threat hunting campaigns using intelligence-led hypotheses, KQL queries, and CrowdStrike Falcon telemetry, identifying attacker tactics, techniques and procedures (TTPs) before alerts fire.
- Lead incident response at Tier 3 level, owning the full lifecycle from detection and containment through eradication, recovery, and post-incident review in line with NIST 800-61.
- Build and maintain SOAR playbooks and PowerShell automation to reduce analyst toil, accelerate alert enrichment, and enforce consistent response actions at scale.

- Operate as the senior technical point of contact for cloud security within Azure and Microsoft Entra ID, governing Conditional Access policies, MFA enforcement, and privileged identity management via BeyondTrust PAM.
- Manage vulnerability management programmes using Pentra BAS, Tenable.io, and AppCheck, prioritising and tracking remediation across an 8,000-user environment.
- Collaborate with architecture, infrastructure, and IT teams to embed security guardrails into new projects and ensure detection coverage keeps pace with the evolving threat landscape.

University of the Arts London (UAL)

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Deployed and operationalised CrowdStrike Falcon EDR across an 8,000-user estate, building out alert triage workflows, detection tuning, and incident playbooks.
- Delivered threat hunting investigations using CrowdStrike Falcon Insight and Microsoft Sentinel, identifying dormant threats and reducing attacker dwell time.
- Managed Microsoft Defender for Endpoint, Defender for Identity, and Microsoft 365 Defender, correlating signals across identity, endpoint, and cloud to accelerate incident leadership.
- Administered Microsoft Entra ID Conditional Access and MFA policies, reducing the organisation's exposure to credential-based attacks.
- Developed KQL-based detection logic in Microsoft Sentinel covering identity-based attacks, data exfiltration patterns, and anomalous administrative activity.
- Automated repetitive SOC tasks using PowerShell and SOAR playbooks, freeing analyst capacity for higher-value threat hunting and detection engineering work.
- Ran regular vulnerability scans with Nessus and Tenable.io, producing risk-ranked reports and working with asset owners to drive timely remediation.

HICX Solutions Ltd (SaaS / FinTech)

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed security operations within a cloud-first SaaS environment, maintaining endpoint protection, identity access controls, and patch compliance across the organisation.
- Configured and maintained Check Point Harmony firewall policies, Mimecast email security, and Intune Mobile Device Management and Mobile Application Management.
- Supported incident response activities, triaging alerts from the SIEM and coordinating remediation with infrastructure and development teams.
- Produced IT security quality documentation and contributed to ISO 27001 compliance activities and internal audit processes.

KEY ACHIEVEMENTS

- Achieved measurable reduction in alert noise in CrowdStrike NG-SIEM through systematic detection engineering, allowing the team to focus on genuine threats rather than false positives.
- Led the full-lifecycle deployment and operationalisation of CrowdStrike Falcon EDR across an 8,000-user university estate, establishing threat hunting and incident response capabilities from the ground up.
- Developed and maintained a library of SOAR playbooks that automated alert enrichment and tier-one response actions, reducing mean time to respond (MTTR) across the security operations function.
- Designed and implemented detection-as-code analytics rules in Microsoft Sentinel aligned to MITRE ATT&CK, substantially increasing detection coverage across identity, endpoint, and cloud attack surfaces.
- Delivered proactive threat hunting campaigns that identified previously unknown attacker footholds, enabling containment before any material impact to the organisation.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+

- Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
