

PROSPER AWUNI

Senior Cyber Security Engineer | Microsoft Sentinel, SOAR and Detection Engineering | Vulnerability Management and Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Cyber Security Engineer with over five years of experience in vulnerability assessment, risk management, Tier 3 incident response, and detection engineering across large-scale enterprise environments. I have a strong record of engineering Microsoft Sentinel detections and Security Orchestration Automation and Response (SOAR) playbooks, conducting threat hunting using Kusto Query Language (KQL) and intelligence-led techniques, and implementing identity access controls and Data Loss Prevention (DLP) controls. I bring a structured, risk-based approach to security operations, aligning detection engineering, threat intelligence, and incident response to frameworks including NIST, CIS Controls, and MITRE ATT&CK. I am immediately available for a hybrid position based in Birmingham.

CORE SKILLS AND TECHNICAL STACK

- **Detection Engineering and SIEM:** Microsoft Sentinel (KQL, analytics rules, SOAR playbooks, Logic Apps), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), alert tuning, custom detection development aligned to MITRE ATT&CK
- **SOAR and Security Automation:** Microsoft Sentinel playbook development, SOAR orchestration, PowerShell scripting, automated enrichment and response
- **Threat Hunting:** Intelligence-led hunting using KQL and CrowdStrike Falcon Insight, hypothesis-driven investigations, attacker tactics, techniques and procedures (TTP) analysis
- **Vulnerability Assessment and Management:** Pentra breach and attack simulation (BAS), Tenable.io, AppCheck, Nessus, risk-ranked reporting and remediation tracking
- **Incident Response:** Tier 3 incident response following NIST 800-61, end-to-end case management, containment, eradication, post-incident review
- **Identity Access Control:** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Data Loss Prevention:** DLP policy design and implementation, endpoint data controls, email security (Mimecast)
- **Endpoint Security:** CrowdStrike Falcon EDR, Prevent, Insight and Discover; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Tanium
- **Risk Management and Compliance:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, threat intelligence monitoring and integration
- **Network and Firewall Security:** Check Point Harmony firewall, network segmentation, perimeter security

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)
Senior Cyber Security Analyst / Engineer

March 2025 - Present

- Engineer Microsoft Sentinel detections and SOAR playbooks, developing KQL analytics rules aligned to the MITRE ATT&CK framework and maintaining a structured detection lifecycle with regular review and improvement cycles.
- Conduct proactive threat hunting using KQL-based queries and intelligence-led techniques, identifying attacker tactics and persistence mechanisms before conventional alerting fires.
- Lead Tier 3 incident response, managing the full lifecycle from initial detection through containment, eradication, recovery, and formal post-incident review in line with NIST 800-61.
- Implement and maintain identity access control measures in Microsoft Entra ID, including Conditional Access policies, Multi-Factor Authentication, and privileged access governance through BeyondTrust PAM.

- Design and enforce Data Loss Prevention controls across endpoint and email channels, reducing the risk of sensitive data exfiltration.
- Deliver vulnerability assessments using Pentera BAS, Tenable.io, and AppCheck, producing risk-ranked findings and working with asset owners to drive timely remediation across an 8,000-user estate.
- Monitor and integrate threat intelligence feeds to inform detection rule updates, hunting priorities, and risk management decisions.
- Participate in security testing and penetration testing activities, contributing to a continuous improvement cycle for the organisation's security posture.

University of the Arts London (UAL)

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Deployed and operationalised CrowdStrike Falcon EDR across an 8,000-user estate, developing detection engineering policies, alert triage workflows, and response playbooks from inception.
- Developed KQL detection rules in Microsoft Sentinel targeting credential-based attacks, data exfiltration patterns, anomalous administrative activity, and lateral movement, aligned to MITRE ATT&CK.
- Administered Microsoft Entra ID Conditional Access and MFA policies, implementing identity access controls that materially reduced the organisation's exposure to credential compromise.
- Implemented and maintained DLP controls across endpoint, email, and cloud channels, using Mimecast and Microsoft 365 policy controls to reduce sensitive data exposure risk.
- Responded to Tier 2 and Tier 3 security incidents, conducting root cause analysis, coordinating containment actions, and producing post-incident reports for senior stakeholders.
- Ran regular vulnerability assessments using Nessus and Tenable.io, prioritising findings by risk score and working with infrastructure teams to achieve agreed remediation timelines.
- Built PowerShell automation and SOAR playbooks to automate alert enrichment, reduce analyst toil, and enforce consistent response actions at scale.

HICX Solutions Ltd (SaaS / FinTech)

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed security operations within a cloud-first SaaS environment, maintaining endpoint protection, identity access controls, and patch compliance across the organisation.
- Implemented and maintained Check Point Harmony firewall policies, Mimecast email security, and Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM).
- Conducted vulnerability assessments and patch management activities, identifying and remediating risk across infrastructure and end-user devices.
- Triage and responded to security incidents, coordinating containment and remediation with infrastructure and development teams and producing incident documentation.
- Contributed to ISO 27001 risk management processes, compliance documentation, and internal audit activities.

KEY ACHIEVEMENTS

- Engineered a comprehensive library of Microsoft Sentinel SOAR playbooks and KQL detection rules, covering identity attacks, lateral movement, data exfiltration, and anomalous administrative behaviour aligned to MITRE ATT&CK.
- Led the end-to-end deployment and operationalisation of CrowdStrike Falcon EDR across an 8,000-user estate, establishing threat hunting and Tier 3 incident response capabilities from the ground up.
- Implemented BeyondTrust Privileged Access Management across the organisation, reducing the risk of privilege escalation and lateral movement by enforcing least-privilege access for all administrative accounts.
- Delivered a structured vulnerability management programme using Pentera BAS and Tenable.io, producing risk-ranked remediation roadmaps that demonstrably improved the organisation's exposure score over time.
- Designed and enforced identity access control and Data Loss Prevention policies that measurably reduced the organisation's credential compromise and data exfiltration risk.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
