

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | SIEM/SOAR/EDR | CISSP

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience protecting enterprise environments across the full security stack. I have deep expertise in CrowdStrike Endpoint Detection and Response (EDR), Security Information and Event Management / Security Orchestration Automation and Response (SIEM/SOAR), Privileged Access Management (PAM), identity and access management, vulnerability management, and incident response. I have led the engineering, tuning, and operational delivery of security tooling at scale, including managing Multi-Factor Authentication (MFA), Single Sign-On (SSO), Mobile Device Management (MDM), Mobile Application Management (MAM), email security gateways, and Intrusion Detection and Prevention Systems (IDS/IPS) for a large, complex organisation. I bring a strong track record in remediating penetration test findings, delivering security awareness programmes, and driving down risk through structured vulnerability remediation. I am seeking a senior permanent hybrid role within financial services where I can apply my broad technical skill set and security engineering expertise to protect critical infrastructure and data.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM, Spotlight) -- Expert
- **SIEM/SOAR:** Microsoft Sentinel, CrowdStrike NG-SIEM, Kusto Query Language (KQL), SOAR automation, playbook development
- **Email and Web Security Gateways:** Mimecast, Check Point Harmony
- **Endpoint and Microsoft 365 Security:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender (M365)
- **Identity and Access Management:** Azure Active Directory (Azure AD) / Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Mobile Device Management and Mobile Application Management (MDM/MAM):** Microsoft Intune
- **Privileged Access Management (PAM):** BeyondTrust
- **Vulnerability Management and Scanning:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Firewall and Network Security:** Check Point Harmony Firewall, Palo Alto (familiarity), IDS/IPS
- **Web Application Security:** Web Application Firewall (WAF), DDoS mitigation concepts
- **Security Scripting and Automation:** PowerShell, SOAR workflows
- **Incident Response:** NIST 800-61 framework, MITRE ATT&CK
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus
- **Tanium:** Endpoint visibility and remediation

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer -- University of the Arts, London (UAL) *March 2025 -- Present*

- Managed the full CrowdStrike Falcon EDR platform (Prevent, Insight, Discover, NG-SIEM) across the enterprise, overseeing alert triage, threat hunting, and EDR policy tuning to reduce false positives and improve detection fidelity.
- Administered SIEM/SOAR operations using Microsoft Sentinel and CrowdStrike NG-SIEM, building KQL detection rules, automating incident workflows, and ensuring timely alert response across the security stack.
- Engineered and maintained email and web security gateway controls including Mimecast, reducing phishing and malware exposure across the organisation.

- Managed the organisation's MFA/SSO implementation via Microsoft Entra ID (Azure AD) and Conditional Access policies, enforcing Zero Trust access principles for over 8,000 users.
- Administered MDM/MAM controls using Microsoft Intune, enforcing device compliance, application management, and mobile security policies across the enterprise.
- Oversaw Privileged Access Management (PAM) operations using BeyondTrust, managing privileged account lifecycle, session recording, and least-privilege enforcement.
- Led vulnerability management programmes using Tenable.io and Pentera Breach and Attack Simulation (BAS), performing regular vulnerability scans, triaging findings, and coordinating remediation with infrastructure and application teams.
- Managed remediation of penetration test findings, prioritising critical and high-risk vulnerabilities and tracking closure through to completion.
- Delivered enterprise security awareness training programmes, developing phishing simulation campaigns and security education content to reduce human risk.
- Responded to security incidents in line with the NIST 800-61 incident response framework, performing containment, eradication, and post-incident reviews.
- Supported security certificate lifecycle management, maintaining visibility and timely renewal of TLS/SSL certificates across the estate.

Cyber Security Analyst, Cyber Security and Identity -- University of the Arts, London (UAL)

March 2022 -- March 2025

- Deployed and managed Microsoft Defender for Endpoint (MDE) across an 8,000-user estate, configuring policies, onboarding devices, and managing alert investigations and remediation.
- Implemented and tuned SIEM detections in Microsoft Sentinel using KQL, developing custom analytic rules, workbooks, and automated response playbooks.
- Managed identity and access controls including Azure AD Conditional Access, MFA rollout, and SSO integrations, reducing unauthorised access risk across the organisation.
- Administered endpoint management through Microsoft Intune (MDM/MAM), enforcing compliance policies and mobile device security baselines.
- Conducted regular vulnerability assessments using Nessus and AppCheck, producing risk-prioritised remediation reports for infrastructure and application owners.
- Maintained IDS/IPS rulesets and network security monitoring, investigating anomalous network traffic and escalating confirmed threats.
- Supported PAM implementation using BeyondTrust, onboarding privileged accounts and enforcing access controls aligned with CIS Controls and ISO 27001 requirements.
- Developed SOAR automation workflows using PowerShell scripting, reducing mean time to respond (MTTR) by automating repetitive triage and containment tasks.
- Contributed to Cyber Essentials Plus certification, evidencing security controls across endpoint, identity, network, and patch management domains.

IT Engineer: Security, Quality and Infrastructure -- HICX Solutions Ltd (SaaS/FinTech)

February 2021 -- March 2022

- Managed security infrastructure for a SaaS/FinTech environment, including firewall administration, endpoint security controls, and user access management.
- Implemented MFA and SSO solutions, strengthening identity controls and reducing unauthorised access risk.
- Conducted internal vulnerability assessments and supported external penetration test remediation, working with development and infrastructure teams to close findings within agreed timelines.
- Maintained MDM controls and supported secure device onboarding for a growing remote workforce.
- Administered IT security policies aligned with ISO 27001 and operational security best practices in a fast-paced SaaS environment.

KEY ACHIEVEMENTS

- Led enterprise-wide deployment and management of Microsoft Defender for Endpoint (MDE) across 8,000 users at UAL, reducing endpoint security incidents and improving detection coverage.

- Implemented CrowdStrike Falcon EDR and NG-SIEM across the UAL estate, delivering mature EDR capabilities and enabling proactive threat hunting across the organisation.
- Deployed BeyondTrust Privileged Access Management (PAM), enforcing least-privilege principles and reducing the attack surface from privileged accounts.
- Drove Cyber Essentials Plus certification by evidencing and improving controls across endpoint protection, access management, patch management, network boundary security, and malware prevention.
- Built and automated SOAR playbooks using PowerShell and Microsoft Sentinel Logic Apps, significantly reducing manual triage time and accelerating incident response.
- Achieved sustained reduction in phishing click rates through structured security awareness training and simulated phishing campaigns delivered to the full university user base.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
