PROSPER AWUNI

Senior Cyber Security Engineer | Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) Specialist

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of experience delivering hands-on cyber security engineering within complex enterprise environments. I specialise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Endpoint Detection and Response (EDR) tools including CrowdStrike Falcon, identity and access management, and vulnerability management. At the University of the Arts London (UAL), I have led detection engineering, alert triage, and incident response across an estate of 8,000 users, using CrowdStrike Falcon, Microsoft Defender, and Microsoft Sentinel with Kusto Query Language (KQL). I bring deep hands-on experience with enterprise security tools, strong communication skills, and a track record of working both independently and within small, high-impact security teams. I am looking to bring this expertise to a focused, senior security engineering role at a global financial services firm in the City of London.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (KQL), Rapid7 InsightIDR, SOAR automation and playbook development, alert triage, detection rule engineering
- **Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender XDR
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Vulnerability Management:** Tenable.io, Nessus, Pentera Breach and Attack Simulation (BAS), AppCheck, remediation tracking and reporting
- **Email and Web Security:** Mimecast email security gateway, Microsoft Defender for Office 365
- **Device and Endpoint Management:** Microsoft Intune (Mobile Device Management / Mobile Application Management), Tanium
- **Frameworks and Standards:** NIST Cyber Security Framework (CSF), NIST 800-61, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus
- **Security Operations:** Incident response, threat hunting, penetration test finding remediation, security awareness training, PowerShell scripting, Check Point Harmony firewall

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer *March 2025 - Present*

University of the Arts, London (UAL)

- Lead engineer for SIEM and SOAR operations across an 8,000-user estate, managing CrowdStrike Falcon NG-SIEM, Microsoft Sentinel, and Microsoft Defender XDR platforms for continuous threat detection and response
- Oversee EDR and XDR alert triage and investigation using CrowdStrike Falcon Prevent, Insight, and Discover; tune detection rules to reduce false positives and improve signal fidelity
- Manage identity and access controls in Microsoft Entra ID, including Conditional Access policies, MFA, and SSO configuration, ensuring least-privilege access across the enterprise
- Administer vulnerability management programme using Tenable.io, Nessus, and Pentera BAS; prioritise and track remediation of penetration test findings across infrastructure and applications
- Operate and maintain email security gateway (Mimecast) and device management platform (Microsoft Intune/MDM/MAM), reducing endpoint and email-borne threats
- Develop and maintain incident response playbooks and SOAR automation workflows using NIST 800-61 and MITRE ATT&CK frameworks; lead security incident investigations from triage through to closure

- Collaborate with IT Security Officer on security architecture decisions and projects; deliver security awareness training to staff across the institution
- Manage BeyondTrust Privileged Access Management (PAM) platform, governing access for privileged accounts across the environment

Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

University of the Arts, London (UAL)

- Performed day-to-day alert triage, threat hunting, and security incident response across SIEM and EDR platforms including CrowdStrike Falcon and Microsoft Sentinel
- Supported deployment and tuning of CrowdStrike Falcon across the 8,000-user estate; wrote KQL detection rules in Microsoft Sentinel to identify threats aligned to MITRE ATT&CK
- Conducted vulnerability assessments and remediation tracking using Tenable.io and AppCheck; worked with infrastructure teams to close identified gaps
- Assisted in administering Microsoft Entra ID (Azure AD), including Conditional Access, MFA, and Identity Protection policies
- Managed certificate lifecycle, Mimecast email security configuration, and Intune mobile device management policies
- Supported implementation and maintenance of BeyondTrust PAM, controlling privileged access to critical systems and infrastructure
- Contributed to Cyber Essentials Plus certification and ISO 27001 alignment activities; authored security policies and documentation

IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

HICX Solutions Ltd (SaaS / FinTech)

- Delivered security and infrastructure engineering for a SaaS-based supplier management platform; responsibilities spanned endpoint security, network security, and IT service quality
- Configured and maintained firewall policies and network security controls; monitored security events and responded to alerts across the environment
- Assisted with vulnerability assessments and patch management, reducing exposure across cloud and on-premises systems
- Supported identity and access management processes, including provisioning and de-provisioning of user accounts and privileged access reviews
- Contributed to IT governance and quality assurance activities, documenting processes and ensuring compliance with internal policies

KEY ACHIEVEMENTS

- Architected and deployed CrowdStrike Falcon EDR and NG-SIEM across an 8,000-user estate at UAL, significantly reducing mean time to detect and respond to endpoint threats
- Developed and deployed SOAR automation playbooks that reduced manual alert triage workload by streamlining repetitive incident response tasks across Microsoft Sentinel and CrowdStrike
- Led UAL's Cyber Essentials Plus certification programme, coordinating remediation activities across multiple IT teams to achieve and maintain compliance
- Designed and implemented Conditional Access and MFA policies in Microsoft Entra ID, materially reducing the risk of identity-based attacks across the 8,000-user environment
- Built and tuned KQL detection rules in Microsoft Sentinel mapped to MITRE ATT&CK, improving detection coverage for high-priority threat actor techniques relevant to the education sector
- Managed end-to-end remediation of critical and high-severity findings from multiple penetration testing engagements, working across infrastructure, application, and identity teams to close gaps

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)

- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
