

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | Endpoint Detection and Response | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of hands-on experience designing, implementing, and managing enterprise-grade security operations across cloud, endpoint, and network environments. I specialise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) using CrowdStrike Next-Generation SIEM (NG-SIEM) and Microsoft Sentinel, and the full spectrum of security infrastructure management including email security gateways (Mimecast), Privileged Access Management (PAM) via BeyondTrust, Mobile Device Management and Mobile Application Management (MDM/MAM) via Microsoft Intune, firewalls (Check Point Harmony), and identity controls through Azure Active Directory (Azure AD) and Entra ID. I have led vulnerability management programmes using Tenable.io, AppCheck, and Nessus, validated control effectiveness with Pentera Breach and Attack Simulation (BAS), and delivered a Microsoft Defender for Endpoint rollout across 8,000 users. I thrive in a focused, hands-on security engineering team and bring the technical breadth and operational discipline required to protect a complex financial services infrastructure.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover, Spotlight; Microsoft Defender for Endpoint (MDE)
- **SIEM / SOAR:** CrowdStrike NG-SIEM, Microsoft Sentinel (Azure Sentinel), KQL detection rule authoring, automated playbook development
- **Email and Web Security:** Mimecast email security gateway; web proxy and content filtering management
- **Firewall / Network Security:** Check Point Harmony; IDS/IPS policy management; WAF and DDoS mitigation concepts
- **Identity and Access Management (IAM):** Azure AD / Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Group Policy
- **Privileged Access Management (PAM):** BeyondTrust (session recording, password vaulting, least-privilege enforcement)
- **Mobile Device Management / Mobile Application Management (MDM/MAM):** Microsoft Intune
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus; Pentera Breach and Attack Simulation (BAS); CVSS-based prioritisation and remediation tracking
- **Incident Response:** NIST SP 800-61, MITRE ATT&CK; end-to-end case management, root-cause analysis, post-incident review
- **Scripting and Automation:** PowerShell, KQL
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Additional Tools:** Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender, Tanium, Cisco security concepts, security awareness training delivery

PROFESSIONAL EXPERIENCE

- Senior Cyber Security Analyst / Engineer | University of the Arts London (UoA) | Feb 2025 - Present
- Senior Cyber Security Analyst / Engineer | CrowdStrike Falcon | Apr 2023 - Present
- Tuning, custom Indicator of Attack (IOA) rule development, Falcon Insight threat investigation and Falcon Discover asset visibility management; reduced detection noise by automating triage of high-volume, low-fidelity alerts.
 - Engineer detection logic in Microsoft Sentinel and CrowdStrike NG-SIEM using KQL; develop SOAR playbooks that automate response actions for common alert categories, reducing mean time to respond (MTTR) for Tier 1 and Tier 2 incidents.

- Manage Mimecast email security gateway, including anti-phishing and anti-spoofing policies, URL protection, and secure messaging, significantly reducing email-borne threat exposure.
- Administer Check Point Harmony firewall and associated IDS/IPS policies; maintain network segmentation controls and investigate anomalous traffic patterns.
- Manage BeyondTrust Privileged Access Management (PAM) platform, implementing least-privilege access policies, session recording, password vaulting, and privileged account lifecycle management.
- Oversee Microsoft Intune MDM/MAM deployment, enforcing device compliance policies, application controls and Conditional Access to managed and Bring Your Own Device (BYOD) endpoints.
- Lead vulnerability management using Tenable.io and AppCheck; conduct Pentra Breach and Attack Simulation (BAS) tests to validate security controls and prioritise penetration test finding remediation with infrastructure teams.
- Implement and maintain Azure AD / Entra ID Conditional Access policies, MFA rollout, SSO integrations, and Privileged Identity Management (PIM) to enforce least-privilege identity controls.
- Respond to and manage security incidents in accordance with NIST SP 800-61; conduct post-incident reviews, implement lessons-learned improvements, and update runbooks and response procedures.
- Design and deliver security awareness training programmes, reducing staff susceptibility to phishing and social engineering attacks.

Cyber Security Analyst, Cyber Security and Identity – University of the Arts, London (UAL) (MDE),
 Managed daily security operations with CrowdStrike Falcon, Microsoft Defender for Endpoint (MDE),
 Microsoft Defender for Identity (MDI) and Microsoft 365 Defender; led a full MDE deployment across 8,000
 users, improving endpoint visibility and reducing incident dwell time. *March 2022 – March 2025*

- Performed SIEM alert triage and incident investigation using Microsoft Sentinel; authored KQL detection rules and SOAR automation workflows to reduce manual analyst effort.
- Administered Check Point Harmony firewall, Mimecast email gateway and web filtering controls; investigated anomalous events and enforced security policies across network perimeter.
- Managed vulnerability scanning using Tenable Nessus and AppCheck; coordinated remediation of identified findings with infrastructure and development teams, tracking closure through change management workflows.
- Supported BeyondTrust PAM operations including privileged account onboarding, session monitoring, and periodic access certification reviews.
- Administered Microsoft Intune MDM/MAM policies for endpoint compliance, application allow-listing and Conditional Access enforcement across Windows and mobile device estates.
- Maintained Azure AD / Entra ID controls including Conditional Access policies, MFA enforcement and SSO configurations for cloud and on-premises applications.
- Documented and updated incident response procedures and security policies in line with ISO 27001, Cyber Essentials Plus and NIST Cybersecurity Framework (CSF) requirements.

IT Engineer, Security, Quality and Infrastructure – HICX Solutions Ltd (SaaS/FinTech)
 Implemented and managed endpoint security platforms including EDR and SaaS firewall tools across the
 SaaS cloud environment, ensuring consistent security policy enforcement. *February 2021 – March 2022*

- Configured and maintained Identity and Access Management (IAM) systems, MFA integrations and SSO for cloud-hosted applications, supporting Zero Trust access principles.
- Performed vulnerability assessments and contributed to remediation of identified security findings in line with company risk appetite.
- Managed firewall rules, network segmentation and access controls to protect internal and customer-facing infrastructure.
- Contributed to ISO 27001 compliance activities including policy development, risk assessment and security controls documentation.

KEY ACHIEVEMENTS

- Deployed Microsoft Defender for Endpoint (MDE) across 8,000 users at UAL, consolidating endpoint protection and delivering significant improvements in threat visibility and incident response speed.
- Engineered CrowdStrike NG-SIEM detection logic and automated SOAR response playbooks that reduced Tier 1 alert investigation time and minimised analyst alert fatigue.

- Implemented BeyondTrust Privileged Access Management (PAM) from the ground up, establishing session recording, password vaulting, and least-privilege policies that materially reduced privileged account risk.
- Introduced Pentera Breach and Attack Simulation (BAS) continuous testing to validate control effectiveness and directly inform vulnerability remediation prioritisation, replacing ad-hoc manual testing cycles.
- Led Mimecast email gateway optimisation project that improved anti-phishing detection rates and reduced security incidents originating from email-borne threats.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
