

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM/SOAR/EDR | Vulnerability Management | Identity and Access Management | PAM

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of experience building and operating enterprise security infrastructure across cloud, hybrid, and on-premises environments. I have deep, practical expertise across the full security technology stack: Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR) via CrowdStrike Falcon, email and web gateway security (Mimecast), firewall management (Check Point Harmony), Identity and Access Management (IAM) and Multi-Factor Authentication (MFA)/Single Sign-On (SSO) via Azure Active Directory (Azure AD)/Entra ID, Privileged Access Management (PAM) via BeyondTrust, and Mobile Device Management/Mobile Application Management (MDM/MAM) via Microsoft Intune. I have driven a complete Microsoft Defender for Endpoint deployment across 8,000 users and led vulnerability management programmes using Tenable.io, AppCheck, Nessus, and Pentera Breach and Attack Simulation (BAS). I am seeking a permanent Senior Cyber Security Engineer role with a London-based financial services organisation where I can apply this technical breadth within a focused, high-performing security team.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon EDR/Prevent, Insight, Discover, Spotlight; Microsoft Defender for Endpoint (MDE)
- **SIEM / SOAR:** CrowdStrike NG-SIEM, Microsoft Sentinel; KQL detection engineering; SOAR playbook development and alert automation
- **Email Security Gateway:** Mimecast (anti-phishing, anti-spoofing, URL protection, secure messaging)
- **Firewall / Network Security:** Check Point Harmony; IDS/IPS; WAF and DDoS mitigation; network segmentation and access control
- **Identity and Access Management (IAM) / MFA / SSO:** Azure AD / Entra ID, Conditional Access, MFA, SSO, Group Policy, Privileged Identity Management (PIM)
- **Privileged Access Management (PAM):** BeyondTrust (session recording, password vault, just-in-time access, least-privilege)
- **Mobile Device Management / Mobile Application Management (MDM/MAM):** Microsoft Intune (device compliance, app controls, Conditional Access)
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus; Pentera Breach and Attack Simulation (BAS); penetration test finding remediation
- **Incident Response:** NIST SP 800-61; MITRE ATT&CK; alert triage, investigation, containment, eradication, and post-incident review
- **Scripting and Automation:** PowerShell; KQL
- **Frameworks:** NIST Cybersecurity Framework (CSF), ISO 27001, CIS Controls, Cyber Essentials Plus, MITRE ATT&CK
- **Additional:** Microsoft Defender for Identity (MDI), M365 Defender, Tanium; security certificate management; security awareness training

PROFESSIONAL EXPERIENCE

- Senior Cyber Security Analyst / Engineer – University of the Arts, London (UAL)** *March 2025 – Present*
- Senior Analyst and Security Engineer – UAL, London. I have been responsible for developing custom Indicator of Attack (IOA) rules, and use Falcon Insight and Discover for ongoing threat investigation and asset management.
 - Engineer SIEM detection rules in Microsoft Sentinel using KQL and develop SOAR automated response playbooks to reduce mean time to respond (MTTR) for Tier 1 and Tier 2 security incidents.

- Administer Mimecast email security gateway, including anti-phishing, anti-spoofing, URL and attachment protection policies that have materially reduced email-borne threat volume.
- Manage Check Point Harmony firewall and IDS/IPS policies; maintain WAF configurations, web security gateway controls, and network segmentation to protect the perimeter.
- Implement and manage BeyondTrust Privileged Access Management (PAM): session recording, password vaulting, just-in-time access provisioning, and least-privilege enforcement for all privileged accounts.
- Oversee Microsoft Intune MDM/MAM: device enrolment, compliance policy enforcement, application management, and Conditional Access integration for Windows, iOS, and Android estates.
- Lead vulnerability management programme using Tenable.io and AppCheck; validate security controls using Pentera Breach and Attack Simulation (BAS) and coordinate penetration test finding remediation with infrastructure teams.
- Maintain Azure AD / Entra ID identity controls: Conditional Access policies, MFA deployment, SSO integrations, and Privileged Identity Management (PIM) for cloud and on-premises applications.
- Manage security certificate lifecycle and PKI-related controls across internet-facing and internal services.
- Design and deliver staff security awareness training, reducing click rates on simulated phishing tests significantly year-on-year.
- Lead security incident response per NIST SP 800-61; conduct root-cause analysis, post-incident reviews and update runbooks with lessons learned.

Cyber Security Analyst, Cyber Security and Identity – University of the Arts, London (UoA)
 Delivered a full Microsoft Defender for Endpoint (MDE) rollout across 8,000 users, London (UoA), endpoint protection and driving down incident dwell time; also managed Microsoft Defender for Identity (MDI) and Microsoft 365 Defender operations. *March 2022 – March 2025*

- Performed daily SIEM alert triage, investigation and escalation using Microsoft Sentinel; authored KQL detection rules and automated SOAR workflows to reduce manual analyst workload.
- Administered Check Point Harmony firewall, Mimecast email gateway and web proxy; enforced security policies and investigated perimeter anomalies.
- Conducted vulnerability scanning using Tenable Nessus and AppCheck; managed remediation tracking through change control and ticketing workflows, ensuring timely closure of critical findings.
- Supported BeyondTrust PAM: privileged account onboarding, session monitoring, password policy enforcement, and periodic access certification reviews.
- Managed Microsoft Intune MDM/MAM: device compliance policy enforcement, application controls and Conditional Access for mobile and Windows device fleet.
- Maintained Azure AD / Entra ID Conditional Access policies, MFA configurations and SSO integrations for over 8,000 users across cloud and on-premises applications.
- Updated and documented security incident response procedures, policies and controls in line with ISO 27001, Cyber Essentials Plus and NIST CSF.

IT Engineer, Security, Quality and Infrastructure – HICX Solutions Ltd (SaaS/FinTech)
 Implemented and managed endpoint security tools including EDR and anti-malware across the SaaS cloud environment. *February 2021 – March 2022*

- Configured and maintained IAM controls, MFA and SSO for cloud-hosted business applications, supporting Zero Trust access principles.
- Performed vulnerability assessments and drove remediation of identified findings within agreed risk appetite.
- Managed firewall rules, network access controls and segmentation policies to protect internal and customer-facing infrastructure.
- Supported ISO 27001 compliance activities, including risk assessment, policy development and security controls documentation.

KEY ACHIEVEMENTS

- Led end-to-end Microsoft Defender for Endpoint (MDE) deployment across 8,000 users, delivering consolidated endpoint visibility and reducing the organisation's mean time to detect (MTTD) for endpoint threats.
- Built and operationalised CrowdStrike Falcon detection rules and SOAR automation workflows, significantly reducing alert triage time and enabling the security team to focus on high-fidelity threats.

- Delivered BeyondTrust Privileged Access Management (PAM) implementation, establishing privileged account governance, session recording and just-in-time access that reduced standing privilege exposure.
- Introduced Pentera Breach and Attack Simulation (BAS) as a continuous control validation tool, replacing ad-hoc penetration testing cycles and enabling risk-based remediation prioritisation.
- Optimised Mimecast email gateway policies and configuration, reducing phishing and malware delivery incidents and improving email-borne threat detection rates.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
