

PROSPER AWUNI

Senior Cyber Security Analyst | Security Operations | Threat Hunting | Incident Response | SIEM

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of progressive experience in cyber security operations, specialising in threat hunting, detection and response, vulnerability assessment remediation, and Security Information and Event Management (SIEM) operations. In my current senior role at the University of the Arts London, I lead security operations across an 8,000-user estate, conducting proactive threat detection and management, developing security playbooks, managing incident response using the NIST 800-61 framework, and working with engineering teams to implement and optimise security tools and controls. I have extensive hands-on experience with Microsoft Sentinel as my primary SIEM platform, alongside CrowdStrike Falcon Endpoint Detection and Response (EDR), Microsoft Defender XDR, and BeyondTrust Privileged Access Management (PAM). I approach security through a continuous improvement mindset, proactively identifying gaps in detection coverage and working collaboratively with managed service providers and internal teams to strengthen the organisation's cyber resilience. I am looking for a senior permanent hybrid role where I can apply these capabilities within a professional services environment.

CORE SKILLS AND TECHNICAL STACK

- **Security Operations and Threat Management:** SIEM alert triage, threat hunting, detection engineering, security monitoring, proactive threat detection, security playbook development
- **SIEM Platforms:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike Falcon NG-SIEM, analytics rules development and tuning
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover; Microsoft Defender for Endpoint (MDE); threat investigation and endpoint forensics
- **Incident Response:** NIST 800-61 Incident Response lifecycle, MITRE ATT&CK framework, containment and eradication, root cause analysis, post-incident reporting
- **Vulnerability Assessment and Remediation:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS), risk-based remediation prioritisation
- **Identity and Access Management:** Microsoft Entra ID / Azure Active Directory (AAD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust PAM
- **Security Automation:** Microsoft Sentinel SOAR playbooks (Logic Apps), PowerShell scripting, automated triage and enrichment
- **Email and Perimeter Security:** Mimecast email gateway, Check Point Harmony firewall, Microsoft Defender for Office 365
- **Endpoint and Device Management:** Microsoft Intune MDM/MAM, Tanium, Microsoft Defender for Identity (MDI)
- **Security Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Lead proactive threat detection and threat management processes across an 8,000-user enterprise estate, using Microsoft Sentinel KQL queries and CrowdStrike Falcon Insight to identify and investigate advanced threats.
- Develop and maintain security playbooks for incident response, threat detection, and operational procedures, ensuring consistent and repeatable security operations responses.
- Manage cyber security incident response in line with NIST 800-61 framework; co-ordinate containment, eradication, and recovery, and produce post-incident reports with MITRE ATT&CK technique mapping and

lessons learnt recommendations.

- Conduct vulnerability assessments using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS); prioritise findings by risk and track remediation through to closure with asset and system owners.
- Work with managed service providers for cyber security incident management, establishing escalation pathways and governance for outsourced security monitoring functions.
- Manage Microsoft Sentinel SIEM: configure data connectors, author KQL analytics rules, develop SOAR playbooks using Logic Apps, and report on security operations metrics to senior stakeholders.
- Engineer Microsoft Entra ID Conditional Access policies, MFA enforcement, and identity governance controls, reducing identity-based attack surface and supporting Zero Trust adoption.
- Manage CrowdStrike Falcon EDR platform, including prevention policy configuration, alert triage, threat hunting, and cross-team incident co-ordination for endpoint threats.
- Lead implementation of security tools and controls in collaboration with engineering teams, including BeyondTrust PAM, Microsoft Intune MDM/MAM, and Mimecast email gateway configurations.
- Deliver security awareness communications to staff across technical and non-technical teams, improving security culture and reducing social engineering risk.

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Performed day-to-day security operations including SIEM alert triage in Microsoft Sentinel, threat monitoring, and cyber security incident management, escalating complex cases to senior engineers.
- Conducted threat hunting investigations using Microsoft Sentinel KQL and CrowdStrike Falcon Insight, identifying and remediating security issues proactively.
- Contributed to vulnerability assessment operations using Tenable.io and Nessus, producing risk-rated remediation reports and co-ordinating remediation with infrastructure teams.
- Developed security playbooks and response runbooks for common incident types, improving consistency and speed of response across the team.
- Managed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) operations: alert investigation, policy management, and incident containment.
- Managed BeyondTrust PAM platform: provisioning privileged accounts, configuring session management policies, and reviewing access governance.
- Administered Mimecast email security gateway, investigating and remediating email-borne threats including phishing, Business Email Compromise (BEC), and malware distribution.
- Supported NIST 800-61 incident response activities, contributing to forensic investigation and post-incident analysis with MITRE ATT&CK framework alignment.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Managed IT security and infrastructure for a Software as a Service (SaaS) fintech platform, implementing endpoint protection, identity and access management controls, and security monitoring.
- Supported vulnerability management processes, conducting security scans and co-ordinating remediation with development and infrastructure teams.
- Contributed to ISO 27001 audit preparation and internal security reviews, supporting evidence collection and process documentation.
- Developed PowerShell automation scripts to streamline security operations and infrastructure management tasks.

KEY ACHIEVEMENTS

- Built and maintained a comprehensive threat hunting programme at UAL using Microsoft Sentinel KQL and CrowdStrike Falcon Insight, identifying and remediating previously undetected threats across the estate.
- Developed a library of security playbooks for incident response at UAL, standardising response procedures and reducing time to contain security incidents.
- Managed a structured vulnerability remediation programme using Tenable.io and Pentera BAS, achieving measurable reduction in critical and high-risk vulnerability exposure across the estate.

- Led Microsoft Entra ID MFA and Conditional Access deployment across 8,000 users at UAL, delivering a phased rollout that strengthened identity security without disrupting business operations.
- Built SOAR automation playbooks in Microsoft Sentinel, automating phishing alert triage and reducing average analyst investigation time per incident significantly.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**
