

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike, SIEM/SOAR, EDR/XDR, Endpoint Security and Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience designing, implementing, and maintaining enterprise-wide security controls across complex hybrid infrastructure. I have deep practical expertise with CrowdStrike Falcon for Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, email and web security gateways including Mimecast, Privileged Access Management (PAM), and identity security across Microsoft Entra ID (formerly Azure Active Directory) and Conditional Access. I am experienced in managing Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, responding to and containing security incidents in line with National Institute of Standards and Technology (NIST) 800-61, remediating penetration testing findings, and delivering security awareness training across large user populations. I bring a proven track record of securing environments at scale and am ready to join a focused IT Security team to implement and maintain robust security across a corporate infrastructure.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response / Extended Detection and Response:** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM, EDR) - Expert; Microsoft Defender for Endpoint (MDE)
- **SIEM / SOAR:** Microsoft Sentinel (strong KQL query authoring and analytics), CrowdStrike Falcon NG-SIEM, SOAR playbook development and automation
- **Email and Web Security Gateways:** Mimecast email security, web filtering, anti-phishing and threat intelligence integration
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Group Policy
- **Privileged Access Management (PAM):** BeyondTrust PAM deployment, session management and privileged credential vaulting
- **Mobile Device Management / Mobile Application Management:** Microsoft Intune - MDM and MAM policy management across Windows, iOS and Android
- **Vulnerability Management:** Tenable.io, Nessus, Pentra Breach and Attack Simulation (BAS), AppCheck - scanning, reporting and remediation prioritisation
- **Firewall and Network Security:** Check Point Harmony, IDS/IPS management, firewall rule review and policy hardening
- **Microsoft Security Suite:** Microsoft Defender for Identity (MDI), Microsoft Defender for Office 365 (M365), Microsoft Defender XDR
- **Incident Response:** NIST 800-61 incident response lifecycle; MITRE ATT&CK framework-aligned threat detection and investigation
- **Scripting and Automation:** PowerShell scripting for security automation, log analysis and reporting; KQL (Kusto Query Language)
- **Compliance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Lead the operational management and tuning of CrowdStrike Falcon EDR/XDR across an estate of over 8,000 endpoints, including policy enforcement, alert triage, threat investigation and containment

- Administer and develop Microsoft Sentinel SIEM analytics rules, detection logic and SOAR automation playbooks using KQL to reduce mean time to detect (MTTD) and mean time to respond (MTTR)
- Manage the organisation's Mimecast email security gateway, including anti-phishing policies, threat intelligence feed integration, impersonation protection and mail flow security hardening
- Oversee Microsoft Entra ID (Azure Active Directory) administration, Conditional Access policy management, MFA enforcement, and SSO configuration for over 8,000 users
- Administer Microsoft Intune MDM and MAM policies, enforcing device compliance, application control and data protection across corporate and personally owned devices
- Manage BeyondTrust Privileged Access Management (PAM), including privileged account vaulting, session recording and just-in-time access provisioning
- Run vulnerability scanning and remediation programmes using Tenable.io and Pentra BAS, prioritising findings by risk exposure and tracking remediation to closure
- Lead incident response investigations in line with NIST 800-61, coordinating with technical teams and stakeholders from initial triage through to post-incident review
- Manage Check Point Harmony firewall policies, IDS/IPS rule sets, certificate lifecycles and web filtering controls
- Oversee remediation of penetration testing findings, triaging results, tracking remediation plans and validating closure through re-testing
- Deliver security awareness training and phishing simulation campaigns, reducing user susceptibility rates across the organisation
- Contribute to audit readiness for ISO 27001, Cyber Essentials Plus and Cyber Assessment Framework (CAF) compliance activities

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Performed SIEM and EDR alert triage, investigating security events and escalating incidents according to defined severity criteria and runbooks
- Conducted vulnerability assessments using AppCheck and Nessus, reporting findings to system owners and supporting remediation tracking
- Supported Microsoft Defender for Identity (MDI) and Microsoft Defender for Office 365 deployment, configuration and ongoing tuning across the university environment
- Administered Entra ID Conditional Access policies, MFA rollout and identity lifecycle processes as part of the Cyber Security and Identity team
- Contributed to the development and maintenance of cyber security policies, procedures, incident runbooks and security awareness resources
- Supported active incident response activities, performing digital forensics, evidence collection and post-incident reporting
- Assisted with Cyber Essentials Plus certification and NIST CSF control mapping activities

HICX Solutions Ltd (Software as a Service / FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Designed and implemented endpoint security controls and Endpoint Detection and Response (EDR) tooling across the organisation's cloud-first infrastructure
- Managed Microsoft Azure and Azure Active Directory environments, enforcing identity security controls, Conditional Access and privileged access policies
- Supported vulnerability management, network security hardening and IT infrastructure projects spanning cloud and on-premises systems
- Delivered quality assurance testing for security tooling and contributed to ISO 27001-aligned information security management activities
- Administered Microsoft Intune for device management, compliance policy enforcement and application deployment across Windows and mobile platforms

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon EDR/XDR across an estate of over 8,000 endpoints, achieving near-complete coverage and measurably improving threat detection capability
- Implemented BeyondTrust Privileged Access Management (PAM) from the ground up, eliminating standing privileged access for critical accounts and reducing lateral movement risk
- Led Microsoft Defender for Identity (MDI) deployment across the UAL Active Directory environment, enabling real-time identity threat detection and attack path visualisation
- Developed and automated SOAR playbooks in Microsoft Sentinel, cutting manual analyst triage time by reducing repetitive Tier 1 alert workflows
- Drove successful Cyber Essentials Plus and ISO 27001 audit readiness programmes, coordinating evidence gathering, control gap remediation and auditor liaison
- Managed end-to-end remediation of critical penetration testing findings, working with system and application owners to close high-severity vulnerabilities within agreed timelines

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
