

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Identity and Access Management | Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of progressive experience securing large enterprise environments. I have deep hands-on expertise across the full security stack: CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) using Microsoft Sentinel and KQL, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) via Microsoft Entra ID and Azure Active Directory (AD), Mobile Device Management (MDM) and Mobile Application Management (MAM) through Microsoft Intune, Privileged Access Management (PAM) via BeyondTrust, Mimecast email security gateway administration, vulnerability scanning and remediation, Intrusion Detection and Prevention (IDS/IPS), Web Application Firewall (WAF) and firewall management, and security awareness training delivery. I have led incident response aligned to the National Institute of Standards and Technology (NIST) 800-61 framework, applied the MITRE ATT&CK framework for adversary emulation and threat hunting, and delivered measurable security improvements across organisations of 8,000-plus users. I thrive in focused, fast-paced security teams within regulated environments and am well placed to contribute immediately in a City of London financial services setting.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE)
- **SIEM/SOAR:** Microsoft Sentinel and KQL; CrowdStrike NG-SIEM; Splunk/SPL
- **Email and Web Security Gateways:** Mimecast email security gateway; WAF/DDoS management
- **Identity and Access Management:** Microsoft Entra ID; Azure Active Directory (AD); Conditional Access; MFA; SSO; Group Policy
- **MDM/MAM:** Microsoft Intune device management; Mobile Application Management (MAM) policy enforcement
- **Privileged Access Management (PAM):** BeyondTrust PAM - privileged account governance, session recording, and access control
- **Vulnerability Management:** Tenable.io; Pentera Breach and Attack Simulation (BAS); AppCheck; Nessus; vulnerability scan/remediation lifecycle
- **Firewalls and Network Security:** Check Point Harmony; IDS/IPS configuration and management; network perimeter security
- **Incident Response:** NIST 800-61 incident response lifecycle; MITRE ATT&CK framework; threat hunting and detection engineering
- **Endpoint Management:** Tanium; Microsoft Intune; endpoint hardening and compliance
- **Scripting and Automation:** PowerShell; SOAR playbook development; automated alert triage workflows
- **Security Frameworks:** NIST Cybersecurity Framework (CSF); CIS Controls; ISO 27001; Cyber Essentials Plus; MITRE ATT&CK
- **Microsoft Security Suite:** Microsoft Defender for Endpoint (MDE); Microsoft Defender for Identity (MDI); Microsoft 365 Defender; Microsoft Purview

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Own and manage the end-to-end SIEM/SOAR/EDR stack, including CrowdStrike Falcon and Microsoft Sentinel, providing continuous monitoring, alert triage, and coordinated incident response across an estate

of over 8,000 users

- Administer Mimecast email security gateway, configuring and tuning policies to defend against phishing, business email compromise (BEC), spam, and malware-bearing attachments
- Manage MFA and SSO controls via Microsoft Entra ID and Azure Active Directory, maintaining Conditional Access policies and enforcing Zero Trust principles across hybrid on-premises and cloud environments
- Lead MDM/MAM deployment via Microsoft Intune, enforcing device compliance profiles and mobile application policies across Windows, macOS, iOS, and Android endpoints
- Administer BeyondTrust Privileged Access Management (PAM) solution, governing and auditing privileged account access, implementing just-in-time access workflows and session recording
- Direct vulnerability scans and remediation cycles using Tenable.io and Pentera Breach and Attack Simulation (BAS), tracking findings from discovery through to verified remediation
- Lead incident response engagements under the NIST 800-61 framework, including containment, eradication, recovery, and post-incident lessons-learned reporting
- Apply the MITRE ATT&CK framework to develop detection use cases, threat hunt hypotheses, and adversary emulation scenarios within CrowdStrike Falcon and Microsoft Sentinel
- Write and tune custom KQL detection rules and SOAR playbooks in Microsoft Sentinel, automating routine triage and reducing mean time to respond (MTTR)
- Deliver organisation-wide security awareness training and phishing simulation campaigns, reducing human-related risk across a diverse user population
- Review and remediate penetration test findings, coordinating technical remediation with infrastructure and application teams and tracking progress to closure
- Manage IDS/IPS and firewall rules, including Check Point Harmony, securing network perimeter and east-west traffic
- Maintain and audit security certificate lifecycles to ensure continuous service availability and compliance with internal policy

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Led the deployment and management of an 8,000-user Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender implementation, significantly improving enterprise threat visibility and response capability
- Monitored, investigated, and escalated security events in Microsoft Sentinel SIEM, authoring custom KQL detection rules aligned to the MITRE ATT&CK framework to improve detection fidelity
- Deployed and managed CrowdStrike Falcon for endpoint protection, host-based behavioral detection, and proactive threat hunting
- Administered Microsoft Entra ID and Azure Active Directory, configuring Conditional Access policies, MFA enforcement, and SSO integrations across enterprise applications
- Managed MDM/MAM policies via Microsoft Intune, ensuring device compliance, patch levels, and configuration baselines were enforced across the endpoint fleet
- Delivered vulnerability assessment programmes using Tenable Nessus and AppCheck, producing risk-prioritised remediation reports for senior stakeholders
- Developed and refined SOAR playbooks and PowerShell automation scripts, streamlining routine incident response tasks including alert enrichment, host isolation, and user account actions
- Administered Mimecast and supported configuration of email security policies including SPF, DKIM, and DMARC enforcement
- Supported Identity Governance reviews, including access recertification campaigns and role-based access control (RBAC) implementation
- Contributed to the security aspects of ISO 27001 and Cyber Essentials Plus accreditation, conducting internal audits and assisting with evidence gathering

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Managed security infrastructure within a fast-paced SaaS and FinTech environment, supporting compliance with ISO 27001, GDPR, and Cyber Essentials Plus

- Administered endpoint security tooling including antivirus, patch management, and endpoint detection, maintaining software and configuration baselines
- Enforced MFA and SSO policies, managing user identities and access permissions across cloud and on-premises platforms
- Supported vulnerability assessment and penetration testing cycles, tracking findings through to remediation and reporting progress to management
- Delivered internal security awareness training to staff, promoting a culture of security-conscious behaviour
- Contributed to IT quality assurance processes and infrastructure projects, bridging security and engineering requirements in an Agile delivery environment

KEY ACHIEVEMENTS

- **Enterprise Defender Rollout:** Successfully deployed Microsoft Defender for Endpoint (MDE) and the Microsoft 365 Defender suite across 8,000 users at UAL, establishing unified XDR visibility and enabling real-time alert correlation across endpoints, identities, and cloud workloads
- **CrowdStrike NG-SIEM Implementation:** Implemented and optimised CrowdStrike Falcon NG-SIEM alongside CrowdStrike EDR (Prevent, Insight, Discover), establishing advanced behavioural detection and threat hunting capability that reduced dwell time for endpoint-based threats
- **BeyondTrust PAM Deployment:** Led the deployment of BeyondTrust Privileged Access Management (PAM), enforcing least-privilege access principles across administrative accounts and implementing session recording for audit and forensics purposes
- **SOAR Automation:** Designed and deployed SOAR playbooks in Microsoft Sentinel, automating alert triage, IOC enrichment, and host isolation workflows, materially reducing analyst workload and mean time to respond (MTTR)
- **Detection Engineering:** Authored a library of custom KQL detection rules in Microsoft Sentinel mapped to MITRE ATT&CK tactics, improving threat detection accuracy and reducing false-positive alert volume for the SOC team
- **Vulnerability Management Programme:** Established a mature vulnerability management lifecycle using Tenable.io, Pentra BAS, and AppCheck, delivering consistent risk-prioritised remediation reporting aligned to CIS Controls and NIST Cybersecurity Framework (CSF)

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
