# PROSPER AWUNI

**Senior Security Engineer | Security Information and Event Management (SIEM) | Endpoint Detection and Response (EDR) | Threat Hunting | Incident Response**

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

## PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Security Engineer with over five years of hands-on experience designing, implementing and operating enterprise-grade security tooling across cloud and endpoint environments. I have deep expertise in Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR) and Security Orchestration, Automation and Response (SOAR) platforms, including CrowdStrike Falcon and Microsoft Sentinel. I specialise in threat hunting, incident response and detection engineering aligned to the MITRE ATT&CK framework, and I bring proven experience hardening Identity and Access Management (IAM) infrastructure through Zero Trust controls, Conditional Access policies and Privileged Access Management (PAM). I am comfortable working across AWS, Azure and hybrid environments and I thrive in remote, distributed teams where clear communication and autonomy drive outcomes.

## CORE SKILLS AND TECHNICAL STACK

- **SIEM and Threat Detection:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel, Kusto Query Language (KQL), Splunk / Search Processing Language (SPL), detection rule authoring aligned to MITRE ATT&CK
- **EDR and XDR:** CrowdStrike Falcon Prevent, Falcon Insight, Falcon Discover, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **SOAR and Automation:** Playbook development and alert automation, BeyondTrust Privileged Access Management (PAM), PowerShell scripting, integration of security tooling across cloud pipelines
- **Incident Response:** End-to-end investigation and containment using NIST 800-61 methodology, forensic analysis, threat intelligence enrichment, post-incident reporting
- **IAM and Zero Trust:** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Privileged Identity Management (PIM)
- **Cloud Security:** Microsoft Azure security controls, cloud workload protection, IAM hardening across hybrid cloud environments
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, Nessus, AppCheck
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+
- **Additional Tools:** Check Point Harmony, Mimecast, Tanium, Microsoft Intune / Mobile Device Management (MDM), Mattermost-compatible collaboration platforms

## PROFESSIONAL EXPERIENCE

**Senior Cyber Security Analyst / Engineer – University of the Arts, London (UAL)** *March 2025 – Present*

- Lead the design, tuning and operation of CrowdStrike Falcon NG-SIEM and Microsoft Sentinel across a complex hybrid environment, writing Kusto Query Language (KQL) analytics rules and CrowdStrike custom detections mapped to MITRE ATT&CK tactics and techniques.
- Drive threat hunting operations across cloud and endpoint telemetry, proactively identifying adversary activity and reducing mean time to detect (MTTD) through iterative detection improvement cycles.
- Lead Security Orchestration, Automation and Response (SOAR) initiatives, building automated playbooks that reduce alert fatigue and accelerate incident containment, integrating BeyondTrust Privileged Access Management (PAM) and Microsoft Sentinel Logic Apps.
- Serve as incident response lead for Priority 1 and Priority 2 security events, coordinating cross-functional response using NIST 800-61 methodology, conducting forensic analysis and producing post-incident reports with actionable remediation recommendations.
- Architect and enforce Identity and Access Management (IAM) controls across Microsoft Entra ID, including Conditional Access policies, Privileged Identity Management (PIM), Multi-Factor Authentication (MFA) rollout and Zero Trust network access (ZTNA) posture improvement.

- Manage vulnerability management lifecycle using Pentera Breach and Attack Simulation (BAS), Tenable.io and AppCheck, prioritising remediation across server, endpoint and cloud workload estate.
- Collaborate with infrastructure and DevOps teams to embed security controls into cloud workloads, aligning implementation to NIST Cybersecurity Framework (CSF) and CIS Controls benchmarks.

**Cyber Security Analyst, Cyber Security and Identity – University of the Arts, London (UAL)** *March 2022 – March 2025*

- Deployed and administered CrowdStrike Falcon across endpoint estate, configuring Endpoint Detection and Response (EDR) policies, Falcon Prevent exclusions and Falcon Insight dashboards to deliver actionable threat visibility.
- Planned and delivered the Microsoft Defender for Endpoint (MDE) rollout across an 8,000-user environment, integrating alerts into Microsoft Sentinel for centralised Security Information and Event Management (SIEM) correlation.
- Built and tuned Sentinel analytics rules and workbooks for continuous threat detection, using KQL to develop detection logic for phishing, lateral movement, credential abuse and data exfiltration scenarios.
- Performed triage, investigation and escalation of security alerts across SIEM, EDR and email security platforms, maintaining investigation records and feeding lessons learned back into detection improvement.
- Administered Microsoft Entra ID (Azure Active Directory) and Conditional Access policies, implementing MFA, SSO integrations and automated account lifecycle controls to reduce identity-related attack surface.
- Conducted vulnerability scans and supported remediation prioritisation using Tenable.io and Nessus, coordinating with application owners and infrastructure teams to track remediation to closure.
- Developed and maintained security runbooks, incident response playbooks and SOAR automation workflows that supported repeatable, auditable responses to common alert types.

**IT Engineer: Security, Quality and Infrastructure – HICX Solutions Ltd (SaaS/FinTech)** *February 2021 – March 2022*

- Designed and implemented security controls for a SaaS and FinTech environment, covering endpoint protection, network segmentation and cloud access security across Microsoft Azure-hosted infrastructure.
- Managed Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies to enforce security baselines across the distributed workforce.
- Supported identity and access governance, including onboarding and offboarding automation, role-based access control (RBAC) configuration and audit log review in Azure Active Directory.
- Contributed to ISO 27001 compliance activities, producing evidence packs and supporting internal audit cycles covering information security management controls.
- Administered endpoint and infrastructure tooling, maintaining patch compliance and coordinating with vendor support for resolution of security-related platform incidents.

## KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon NG-SIEM and EDR across UAL's estate, reducing endpoint threat dwell time and providing unified visibility across cloud and on-premises environments.
- Led the end-to-end rollout of Microsoft Defender for Endpoint (MDE) across 8,000 users, integrating with Microsoft Sentinel to create a correlated SIEM and XDR detection layer.
- Built and operationalised a library of MITRE ATT&CK-aligned detection rules in CrowdStrike and Sentinel, directly reducing mean time to detect (MTTD) for high-priority threat categories.
- Designed automated SOAR playbooks integrating BeyondTrust PAM with Microsoft Sentinel, eliminating manual steps from common incident response workflows and cutting mean time to respond (MTTR).
- Implemented Zero Trust IAM controls across Microsoft Entra ID including Conditional Access, Privileged Identity Management (PIM) and MFA, materially improving UAL's identity security posture.
- Achieved and maintained CISSP certification, demonstrating broad, senior-level competence across all security engineering and architecture domains.

## EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

## CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)

- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
