

PROSPER AWUNI

Senior Cyber Security Engineer | Security Capabilities, SIEM, EDR and Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience delivering and evolving security capabilities across complex IT environments. I have a strong track record of designing, implementing, and maintaining Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR), email security, and identity and access management (IAM) solutions, integrating platforms and telemetry to build resilient, detection-led security operations. I have hands-on experience with Microsoft Sentinel, CrowdStrike Falcon, Mimecast, Microsoft Entra ID (Azure Active Directory), Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), and BeyondTrust Privileged Access Management (PAM). I take a risk-informed, engineering-focused approach to cyber security, turning strategy, incident learnings, and vulnerability assessment findings into practical, measurable security outcomes. I am passionate about building organisations that are resilient against evolving cyber threats and align with frameworks including the NIST Cybersecurity Framework (CSF) and Cyber Essentials Plus.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and threat monitoring:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), detection rule development and platform tuning
- **EDR and endpoint security:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Tanium
- **Email and web security:** Mimecast, Microsoft Exchange Online Protection, Domain-based Message Authentication, Reporting and Conformance (DMARC) policy management
- **Identity and access management:** Microsoft Entra ID (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust PAM (equivalent to enterprise PAM solutions including CyberArk)
- **Endpoint management:** Microsoft Intune (MDM/MAM), CrowdStrike Falcon Prevent, Tanium
- **Vulnerability management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Incident response:** NIST 800-61 methodology, MITRE ATT&CK framework, digital forensics, Security Orchestration, Automation and Response (SOAR)
- **Network and firewall security:** Check Point Harmony firewall, network segmentation
- **Cloud platforms:** Microsoft Azure, Microsoft 365, Azure AD/Entra ID
- **Scripting:** PowerShell scripting and automation
- **Frameworks:** NIST CSF, Center for Internet Security (CIS) Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Design, implement, and continuously evolve security capabilities across IT infrastructure, integrating SIEM, EDR, email security, and IAM platforms to deliver comprehensive threat visibility and response capability.
- Manage and optimise Microsoft Sentinel SIEM, developing KQL detection rules, correlation logic, and Security Orchestration, Automation and Response (SOAR) playbooks that translate strategy and incident learnings into engineering outcomes.
- Operate and tune CrowdStrike Falcon EDR platform, hardening endpoint security policies, investigating endpoint-sourced alerts, and driving incidents through to containment and remediation following the NIST 800-61 incident response lifecycle.
- Administer Mimecast email security gateway, configuring advanced threat protection, anti-spoofing, and DMARC policies to protect the organisation against phishing and Business Email Compromise (BEC) threats.
- Manage Microsoft Entra ID (Azure AD) security controls, including Conditional Access policies, phishing-resistant MFA, and SSO, ensuring identity security is maintained across on-premises and cloud-hosted applications.

- Lead vulnerability management using Tenable.io and Pentera BAS, identifying critical exposures and collaborating with infrastructure teams to drive timely remediation of findings.
- Conduct threat hunting using MITRE ATT&CK framework mapping, proactively identifying indicators of compromise and attacker tradecraft before they escalate to full incidents.
- Produce post-incident reports and contribute to security architecture reviews, ensuring that lessons learned are embedded into security controls and detection capabilities.

University of the Arts London (UAL) - Cyber Security and Identity

March 2022 - March 2025

Cyber Security Analyst

- Delivered the end-to-end deployment of MDE across an 8,000-user estate, integrating EDR telemetry with Microsoft Sentinel to enable centralised detection, alerting, and automated response across the full endpoint estate.
- Administered BeyondTrust PAM solution, enforcing privileged access controls, managing service account lifecycle, and ensuring audit trails for privileged activity across IT systems.
- Developed and maintained Microsoft Sentinel detection rules and KQL queries, reducing alert noise and improving detection coverage for high-priority threat scenarios including ransomware, credential attacks, and data exfiltration.
- Managed Microsoft Intune MDM/MAM policies, enforcing device compliance baselines and remote wipe capabilities across a mixed-ownership fleet of Windows, iOS, and Android devices.
- Supported incident response investigations, coordinating containment and eradication activities with infrastructure and IT operations teams and producing formal post-incident documentation.
- Conducted vulnerability assessments using Nessus and AppCheck, reporting findings in risk-prioritised format and tracking remediation through to completion.
- Configured Check Point Harmony firewall policies to enforce network segmentation and protect critical systems from lateral movement and unauthorised access.

HICX Solutions Ltd (SaaS / FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Supported security operations across a cloud-hosted SaaS environment, implementing endpoint security controls, access management, and monitoring solutions aligned with ISO 27001 and Cyber Essentials requirements.
- Managed identity and access management, configuring SSO, MFA, and role-based access controls across corporate systems, cloud platforms, and SaaS applications.
- Performed vulnerability scanning and supported remediation tracking, ensuring timely patching and configuration hardening across servers, endpoints, and cloud infrastructure.
- Maintained IT security policies, procedures, and risk registers, contributing to the organisation's information security management framework and audit readiness.
- Supported infrastructure engineering including server build and provisioning, network configuration, and implementation of monitoring tooling to maintain system availability and resilience.

KEY ACHIEVEMENTS

- Delivered the deployment of MDE across an 8,000-user estate, building integrated EDR-to-SIEM telemetry pipelines that provided real-time threat visibility across the entire endpoint estate.
- Engineered a comprehensive SIEM detection library in Microsoft Sentinel with KQL, mapped to MITRE ATT&CK, improving detection of credential attacks, ransomware precursors, and data exfiltration indicators.
- Built SOAR automation in Microsoft Sentinel using PowerShell, reducing mean time to respond for high-severity incidents by automating alert triage, enrichment, and containment actions.
- Established an ongoing vulnerability management programme using Pentera BAS, Tenable.io, and AppCheck, identifying critical exposures and driving structured remediation across cloud and on-premises infrastructure.
- Hardened the Microsoft Entra ID (Azure AD) environment, deploying Conditional Access policies and phishing-resistant MFA to reduce the risk of identity-based attacks across the organisation.
- Secured the Mimecast email gateway by implementing advanced impersonation protection, DMARC, and sandboxed attachment analysis, significantly reducing successful phishing delivery rates.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
