PROSPER AWUNI

Senior Analyst | CrowdStrike Falcon Complete | Incident Response and Threat Detection

United Kingdom (Remote/Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Analyst with over five years of deep, hands-on experience using the CrowdStrike Falcon platform across its full suite of capabilities, including Endpoint Detection and Response (EDR), Next-Generation Security Information and Event Management (NG-SIEM), Falcon Prevent, Falcon Insight, and Falcon Discover. I have led the monitoring and in-depth analysis of security alerts, managed end-to-end incident handling across Windows, macOS, and Linux platforms, and conducted malware analysis and remote remediation of malicious activity at enterprise scale. I have developed detection and triage processes, mentored junior analysts, and contributed to continuous improvement of security operations for an estate of more than 8,000 users. I thrive in fast-paced, high-trust remote environments and am passionate about delivering outstanding outcomes for customers through the CrowdStrike platform.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon Platform:** Falcon Prevent (Next-Generation Antivirus), Falcon Insight (Endpoint Detection and Response), Falcon NG-SIEM, Falcon Discover (asset management), Falcon Complete (managed detection and response) - expert-level proficiency across 8,000-endpoint deployment
- **Incident Handling and Response:** NIST 800-61 Incident Response lifecycle, malware analysis, remote remediation, containment, eradication, and post-incident review across Windows, macOS, and Linux platforms
- **Threat Detection and Analysis:** Proactive threat hunting, alert triage, detection engineering, MITRE ATT&CK framework mapping, behavioural analysis, indicator of compromise (IOC) investigation
- **SIEM and Detection Engineering:** Microsoft Sentinel, Kusto Query Language (KQL), detection rule development, Security Orchestration, Automation and Response (SOAR) playbook creation
- **Microsoft Security Stack:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender for Microsoft 365 (M365), Microsoft Entra ID
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Scripting and Automation:** PowerShell automation, SOAR workflow development, automated triage and response playbooks
- **Certifications:** CISSP, CompTIA Security+, Microsoft Certified Solutions Associate (MCSA)

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) | Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead monitoring and in-depth analysis of security alerts across the CrowdStrike Falcon platform (Prevent, Insight, NG-SIEM) and Microsoft Sentinel, covering an estate of 8,000+ users and endpoints.
- Manage end-to-end incident handling across Windows, macOS, and Linux environments, executing the full NIST 800-61 lifecycle from initial detection and triage through containment, eradication, remote remediation, and post-incident review.
- Conduct malware analysis and remote remediation of malicious activity using CrowdStrike Falcon's Real-Time Response (RTR) capability, isolating compromised systems and removing malicious artefacts without service disruption.
- Develop and maintain detection and triage processes within the CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, writing custom KQL detections aligned to MITRE ATT&CK tactics and techniques to improve threat coverage.
- Mentor and quality-assure junior analysts, conducting case reviews, sharing investigation methodologies, and delivering informal training on CrowdStrike platform features and threat hunting techniques.
- Build and manage Security Orchestration, Automation and Response (SOAR) playbooks using PowerShell, automating repetitive triage tasks and reducing analyst workload by over 40%.

- Perform proactive threat hunting exercises using CrowdStrike Falcon Insight and KQL queries in Sentinel, identifying indicators of compromise, lateral movement, and persistence mechanisms before they escalate to full incidents.
- Act as the senior escalation point for complex incident cases, providing expert guidance on CrowdStrike platform configuration, detection policy tuning, and investigation methodology.

University of the Arts London (UAL) | Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Delivered day-to-day monitoring and analysis of CrowdStrike Falcon alerts, investigating endpoint detections across Windows, macOS, and Linux systems and escalating confirmed threats in accordance with the incident response playbook.
- Played a key role in the enterprise deployment of CrowdStrike Falcon across 8,000 endpoints, configuring Falcon Prevent policies, custom Indicators of Attack (IOA), and sensor update rings to ensure full coverage with minimal operational impact.
- Utilised CrowdStrike Falcon Insight to conduct threat hunting using process trees, event search, and custom indicators, uncovering several previously undetected persistence mechanisms on user workstations.
- Supported Microsoft Sentinel alert triage alongside CrowdStrike, correlating events across both platforms to build a comprehensive picture of attacker activity and improve detection fidelity.
- Contributed to the development of detection and triage runbooks for common attack patterns including phishing, credential stuffing, and endpoint compromise, reducing mean time to respond for those alert categories.
- Used CrowdStrike Falcon Discover to maintain asset inventory accuracy and identify unmanaged devices, supporting the vulnerability management programme and reducing blind spots in the security estate.

HICX Solutions Ltd (SaaS/FinTech) | IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Implemented endpoint security controls and assisted with the evaluation of Endpoint Detection and Response (EDR) solutions, supporting the organisation's move toward a more mature security operations capability.
- Managed vulnerability scanning and patching workflows, reducing exposure to known vulnerabilities across the SaaS infrastructure and supporting ISO 27001 compliance.
- Responded to and investigated security incidents, following defined runbooks and escalating to senior engineers as required, building foundational incident handling skills.
- Monitored security alerts and events across available tooling, supporting the development of detection and response processes in a high-growth FinTech environment.

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon across 8,000 endpoints at UAL, achieving full real-time endpoint visibility and cutting mean dwell time for detected threats significantly.
- Identified and contained a sophisticated multi-stage attack campaign using CrowdStrike Falcon Insight process trees, preventing lateral movement and data exfiltration before escalation.
- Developed 15+ SOAR playbooks automating common CrowdStrike and Sentinel alert handling tasks, reducing analyst handling time by over 40% and freeing the team for proactive threat hunting.
- Mentored two junior analysts in CrowdStrike platform proficiency, investigation techniques, and MITRE ATT&CK-aligned threat hunting, improving overall team capability and detection coverage.
- Contributed to Pentera Breach and Attack Simulation (BAS) exercises at UAL, translating simulated adversary findings into new CrowdStrike detection rules and Sentinel analytics, closing coverage gaps aligned to MITRE ATT&CK.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
