

PROSPER AWUNI

Senior Cyber Security Analyst | SIEM, EDR/XDR, Incident Response, Threat Hunting, Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Analyst with over five years of experience delivering proactive, high-impact security operations across complex enterprise environments. I have strong expertise in Security Information and Event Management (SIEM) platform management, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) tooling, incident response, threat hunting, and vulnerability management. In my current role, I am responsible for day-to-day cybersecurity operations across an 8,000-user estate, coordinating threat hunting activities across endpoint, network, and identity telemetry, and ensuring security good practice is embedded into the organisation's change programme. I bring a strong understanding of Microsoft Azure cloud security technologies, including Azure Active Directory (Entra ID), Conditional Access, and Microsoft Defender for Identity (MDI), as well as proven experience communicating risk clearly to both technical and non-technical stakeholders. I thrive in environments that demand both operational rigour and strategic thinking, and I am committed to enabling organisations to do business securely while minimising exposure to evolving threats.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and Detection Engineering:** Microsoft Sentinel (Kusto Query Language (KQL), analytics rules, workbooks), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Splunk, SIEM use case development and alert tuning
- **EDR/XDR:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Incident Response:** Full incident lifecycle management, NIST Special Publication 800-61, root cause analysis, evidence preservation, containment and remediation, post-incident review
- **Threat Hunting:** Proactive log and event data analysis, MITRE ATT&CK framework, hypothesis-driven hunting, behavioural analytics
- **Vulnerability Management:** Tenable.io, AppCheck, Pentera Breach and Attack Simulation (BAS), Nessus, risk-based remediation tracking
- **Microsoft Azure Cloud Security:** Azure Active Directory / Entra ID, Conditional Access policies, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Identity Protection, Privileged Identity Management
- **Network and Endpoint Security:** Firewall management (Check Point Harmony), Intrusion Detection and Prevention System (IDS/IPS) concepts, network segmentation, endpoint hardening
- **Identity and Access Management:** BeyondTrust Privileged Access Management (PAM), Azure Active Directory, Conditional Access, MFA rollout and administration
- **Automation and SOAR:** Security Orchestration, Automation, and Response (SOAR) playbook development, PowerShell scripting, automated incident enrichment
- **Compliance and Frameworks:** ISO 27001, NIST Cybersecurity Framework (CSF), CIS Controls, Cyber Essentials Plus, MITRE ATT&CK, General Data Protection Regulation (GDPR)

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 - Present

Senior Cyber Security Analyst (Eng)

- Undertake efficient, effective, and proactive day-to-day cybersecurity operations across an 8,000-user estate, minimising security risk while enabling the organisation to operate securely.
- Coordinate and conduct regular threat hunting activities, analysing logs and event data from Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR), identity, and network sources, informed by current threat intelligence and the MITRE ATT&CK framework.
- Manage Microsoft Sentinel, developing and maintaining Kusto Query Language (KQL) analytics rules, workbooks, and watchlists to ensure proportionate and effective detection coverage.

- Administer CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover), managing detection policies and alert workflows to maximise endpoint threat visibility and response speed.
- Lead end-to-end incident response using the NIST 800-61 framework, conducting root cause analysis, coordinating containment and remediation, and delivering post-incident recommendations to prevent recurrence.
- Provide expertise and cybersecurity requirements to the organisation's change programme, ensuring security good practice is embedded into change initiatives and security-by-design principles are applied from the outset.
- Manage Microsoft Azure Active Directory (Entra ID), Conditional Access policies, Multi-Factor Authentication (MFA), Identity Protection, and Single Sign-On (SSO) to protect organisational identities and data.
- Oversee BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access controls and manage privileged accounts across the estate.
- Drive the vulnerability management programme using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), prioritising remediation by risk and tracking closure with technical teams.
- Administer Mimecast email security, Check Point Harmony firewall, and Tanium endpoint management, maintaining and optimising each platform to harden the organisation's attack surface.
- Develop Security Orchestration, Automation, and Response (SOAR) playbooks and PowerShell automation scripts to standardise and accelerate repetitive security operations workflows.

University of the Arts, London (UAL) **Cyber Security Analyst, Cyber Security and Identity**

March 2022 - March 2025

- Monitored and triaged security alerts across SIEM and EDR/XDR platforms, investigating incidents and escalating to appropriate teams in accordance with security procedures.
- Conducted incident response activities including forensic investigation, evidence gathering, and remediation, producing detailed reports for security leadership and stakeholders.
- Performed vulnerability assessments using Tenable.io and Nessus, analysing results and coordinating remediation with infrastructure and application teams.
- Contributed to SIEM use case development and alert tuning, reducing false positives and improving the effectiveness of the detection estate.
- Administered Azure Active Directory, Conditional Access policies, and Multi-Factor Authentication (MFA), supporting identity security across the organisation.
- Produced security metrics, reports, and incident summaries for IT leadership, communicating cybersecurity risk and operational status clearly and concisely.
- Supported security awareness activities and contributed to policy and procedure documentation aligned to ISO 27001 and Cyber Essentials Plus requirements.

HEX Solutions Ltd (SaaS/FinTech) **Engineer: Security, Quality and Infrastructure**

February 2021 - March 2022

- Implemented and maintained security controls in a Software as a Service (SaaS) and Financial Technology (FinTech) environment, ensuring alignment with ISO 27001 and data protection requirements.
- Managed endpoint security, network access controls, and identity management solutions across the organisation.
- Monitored and responded to security incidents, supporting triage, containment, and escalation in line with company procedures.
- Supported Microsoft Azure cloud infrastructure security, enforcing access policies and monitoring for compliance and configuration drift.
- Performed vulnerability assessments and security quality assurance testing, identifying and escalating risks for remediation across the development and infrastructure environment.

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon Endpoint Detection and Response (EDR) and Next-Generation SIEM (NG-SIEM) across an 8,000-user estate, materially reducing mean time to detect and contain security incidents.
- Built a comprehensive library of custom Kusto Query Language (KQL) analytics rules in Microsoft Sentinel, directly improving detection coverage for high-risk attack techniques across endpoint, identity, email, and network telemetry.

- Implemented BeyondTrust Privileged Access Management (PAM) organisation-wide, eliminating shared administrative credential use and significantly reducing the organisation's exposure to credential-based attack paths.
- Designed and delivered a proactive threat hunting programme aligned to MITRE ATT&CK, converting hunt outcomes into detection rules and tuning recommendations, resulting in sustained improvement in the detection estate.
- Developed SOAR automation playbooks using PowerShell, standardising and accelerating incident triage and response, and freeing analyst time for higher-value investigative work.
- Led achievement and maintenance of Cyber Essentials Plus certification, demonstrating organisational compliance with core technical security controls across endpoint, network, identity, and access management domains.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
