

PROSPER AWUNI

Senior Cyber Security Analyst | SOC Operations, SIEM/SOAR, Incident Response, Detection Engineering, Cyber Advisory

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Analyst with over five years of experience in Security Operations Centre (SOC) analysis, incident response, Security Information and Event Management (SIEM) and Security Orchestration, Automation, and Response (SOAR) platform management, and detection engineering. I have strong expertise across advanced cybersecurity concepts including malware analysis, threat hunting, and vulnerability management, combined with practical experience operating CrowdStrike Falcon, Microsoft Sentinel, Microsoft Defender Extended Detection and Response (XDR), and a broad range of supporting security technologies. I have direct experience implementing mitigation and remediation activities following cyber incidents, working with automation and playbooks to improve SOC efficiency, and contributing to the development of security services and products. I am equally comfortable delivering complex technical analysis and communicating cyber security risk and findings clearly to customers and non-technical stakeholders. I am looking for a senior analyst role within a managed security services environment where I can protect customers from evolving threats, drive continuous improvement in detection and response capability, and deliver high-quality cyber advisory support.

CORE SKILLS AND TECHNICAL STACK

- **SOC Operations and SIEM:** Microsoft Sentinel (Kusto Query Language (KQL), analytics rules, workbooks), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Splunk, alert triage, SIEM use case development and tuning
- **SOAR and Automation:** Security Orchestration, Automation, and Response (SOAR) playbook development, automated incident enrichment, PowerShell scripting, workflow automation
- **Incident Response:** Full incident lifecycle (detection, analysis, containment, eradication, recovery, lessons learned), NIST Special Publication 800-61, root cause analysis, malware investigation
- **Detection Engineering:** SIEM use case and analytics rule development, alert tuning, MITRE ATT&CK-aligned detection, false positive reduction
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Vulnerability Management:** Tenable.io, AppCheck, Pentera Breach and Attack Simulation (BAS), Nessus, risk-based remediation
- **Identity and Access Management:** Microsoft Azure Active Directory / Entra ID, Conditional Access policies, Multi-Factor Authentication (MFA), BeyondTrust Privileged Access Management (PAM)
- **Network and Perimeter Security:** Firewall management (Check Point Harmony), email security (Mimecast), Intrusion Detection and Prevention (IDS/IPS) concepts, network segmentation
- **Cyber Risk and Advisory:** Risk communication to customers and stakeholders, security posture assessment, cyber security awareness, remediation guidance
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), ISO 27001, CIS Controls, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) ~~Senior Cyber Security Analyst (EAL)~~ Engineer

March 2025 - Present

- Analyse security alerts and detections from Security Information and Event Management (SIEM) and Endpoint Detection and Response (EDR) platforms across an 8,000-user environment, investigating incidents and coordinating response actions to protect the organisation from evolving cyber threats.
- Develop and maintain Kusto Query Language (KQL) analytics rules, workbooks, and detection use cases in Microsoft Sentinel, continuously improving detection accuracy and coverage across the enterprise.

- Work with SOAR automation and playbooks using PowerShell scripting to implement consistent, efficient incident triage and response workflows, reducing manual analyst effort and accelerating remediation.
- Implement mitigation and remediation activities following cyber incidents in line with the NIST 800-61 incident response framework, conducting root cause analysis and delivering post-incident recommendations.
- Administer CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover), managing detection policies, threat hunting workflows, and alert configuration to maximise endpoint threat visibility.
- Operate Microsoft Defender Extended Detection and Response (XDR), including Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), managing the full alert investigation and remediation lifecycle.
- Contribute to the development of the organisation's cyber security operations capability, identifying opportunities to improve detection coverage, tool efficiency, and incident response maturity.
- Manage the vulnerability management programme using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), communicating findings and risk to technical and non-technical stakeholders.
- Deliver cyber security advisory support to IT teams and business stakeholders, translating complex security concepts and risks into clear, actionable guidance.
- Administer BeyondTrust Privileged Access Management (PAM), Mimecast email security, Check Point Harmony firewall, and Tanium endpoint management, maintaining the breadth of the security control estate.

University of the Arts, London (UAL) **Senior Security Analyst, Cyber Security and Identity**

March 2022 - March 2025

- Monitored, triaged, and investigated security alerts from SIEM and EDR platforms, escalating incidents and coordinating response actions in line with security procedures.
- Supported the implementation of mitigation and remediation activities following security incidents, contributing to containment, eradication, and recovery workflows.
- Contributed to SIEM use case development and alert tuning, working to reduce false positives and improve the efficiency and effectiveness of SOC operations.
- Performed threat hunting activities using endpoint, identity, and email telemetry, applying the MITRE ATT&CK framework to surface adversary activity not caught by automated alerting.
- Administered Microsoft Azure Active Directory, Conditional Access policies, and Multi-Factor Authentication (MFA), supporting identity security across the enterprise.
- Conducted vulnerability assessments using Tenable.io and Nessus, producing risk-prioritised reports and tracking remediation with infrastructure teams through to closure.
- Delivered security advisory support to IT colleagues and business stakeholders, communicating risk and remediation guidance clearly in both technical and non-technical terms.

HEX Solutions Ltd (SaaS/FinTech) **Engineer, Security, Quality and Infrastructure**

February 2021 - March 2022

- Implemented and maintained security controls within a Software as a Service (SaaS) and Financial Technology (FinTech) environment, ensuring alignment with ISO 27001 and industry security standards.
- Monitored security events and responded to incidents, supporting initial triage, containment, and escalation in line with company security procedures.
- Managed endpoint security, network access controls, and identity management solutions to maintain a secure operational environment.
- Performed vulnerability assessments and security quality assurance testing, identifying risks and coordinating remediation with development and infrastructure teams.
- Delivered security awareness and advisory support to colleagues, contributing to a security-conscious culture across the organisation.

KEY ACHIEVEMENTS

- Led the enterprise-wide deployment of CrowdStrike Falcon Endpoint Detection and Response (EDR) and Next-Generation SIEM (NG-SIEM) across an 8,000-user estate, significantly improving threat visibility and reducing mean time to detect and respond to security incidents.

- Developed a comprehensive suite of SOAR automation playbooks and PowerShell scripts, standardising incident triage and response workflows and freeing analyst capacity for complex investigation and advisory work.
- Built a library of custom Kusto Query Language (KQL) analytics rules in Microsoft Sentinel mapped to the MITRE ATT&CK framework, materially improving detection coverage and alert quality.
- Implemented Pentera Breach and Attack Simulation (BAS) to continuously validate security control effectiveness, directly informing detection engineering priorities and demonstrating measurable improvements in security posture.
- Deployed BeyondTrust Privileged Access Management (PAM) across the organisation, eliminating shared administrative credentials and significantly reducing privileged access risk.
- Achieved and maintained Cyber Essentials Plus certification, demonstrating organisational compliance with core technical security controls and strengthening the organisation's security posture across endpoint, network, and identity domains.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
