

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Incident Response | Hybrid,
London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience designing, implementing and maintaining robust security controls across complex, multi-site enterprise environments. I bring deep expertise in CrowdStrike Endpoint Detection and Response (EDR) -- spanning the Falcon Prevent, Insight, Discover and Next-Generation Security Information and Event Management (NG-SIEM) modules -- alongside proven capability in Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), Web Application Firewall (WAF), Intrusion Detection and Prevention (IDS/IPS), and Privileged Access Management (PAM). I have led alert triage, incident response and vulnerability scan programmes protecting large user populations, and I work fluently across Multi-Factor Authentication (MFA) and Single Sign-On (SSO) platforms, Mobile Device Management (MDM) and Mobile Application Management (MAM) solutions, email security gateways, and firewall infrastructure. I thrive in small, focused security teams where I can take full ownership of controls and deliver measurable improvements to an organisation's overall security posture.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) and SIEM/SOAR:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, NG-SIEM), Microsoft Sentinel, Splunk
- **Threat Detection and Incident Response:** Alert triage, threat hunting, digital forensics, NIST 800-61 incident response lifecycle, MITRE ATT&CK framework
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS), vulnerability scan/remediation workflows, penetration test finding remediation
- **Identity and Access Management (IAM):** Microsoft Entra ID (Azure Active Directory), Conditional Access, MFA/SSO, Privileged Access Management (PAM) via BeyondTrust
- **Mobile Device Management (MDM) and Mobile Application Management (MAM):** Microsoft Intune, device compliance policy design and enforcement
- **Email and Web Security:** Mimecast email security gateway, Web Application Firewall (WAF), Distributed Denial of Service (DDoS) mitigation, URL filtering
- **Firewall and Network Security:** Check Point Harmony, network segmentation, IDS/IPS management, Palo Alto firewall exposure
- **Endpoint Protection:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender for Microsoft 365 (M365)
- **Security Awareness and GRC:** KnowBe4-style phishing simulation, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, security awareness training delivery
- **Scripting and Automation:** PowerShell, Kusto Query Language (KQL), SOAR playbook development

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst (EAE) Engineer

March 2025 – Present

- Lead engineer for CrowdStrike Falcon EDR across the enterprise estate; tuned detection policies, managed exclusions, and drove Falcon NG-SIEM adoption to consolidate alerting and reduce mean time to detect.
- Administer and maintain the Mimecast email security gateway, enforcing policies to block phishing, malware, and impersonation attempts at scale across the organisation.
- Manage SIEM/SOAR alert triage and incident response workflows, triaging high-fidelity alerts, coordinating containment actions, and producing post-incident documentation aligned to NIST 800-61.
- Operate and develop the Privileged Access Management (PAM) programme using BeyondTrust, controlling privileged session recording, just-in-time access provisioning, and credential vaulting.

- Oversee Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, maintaining compliance policies across Windows, macOS, iOS and Android endpoints.
- Drive vulnerability scan and remediation cycles using Tenable.io and AppCheck, prioritising findings by exploitability and business risk, and tracking remediation to closure.
- Configure and maintain Multi-Factor Authentication (MFA), Single Sign-On (SSO) and Conditional Access policies in Microsoft Entra ID (Azure Active Directory) for 8,000+ users.
- Deliver IDS/IPS policy reviews, firewall rule audits and penetration test finding remediation in collaboration with external assessors.
- Produce regular security metrics, management reports and security awareness training materials.

Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Deployed and rolled out Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft Defender for Microsoft 365 (M365) across an 8,000-user estate, significantly improving endpoint visibility and threat detection coverage.
- Monitored and triaged SIEM alerts daily, using CrowdStrike Falcon Insight and Microsoft Sentinel with KQL to detect lateral movement, credential abuse, and data exfiltration attempts.
- Performed proactive threat hunting exercises using MITRE ATT&CK-mapped hypotheses, uncovering misconfigurations and potential threats before they escalated.
- Managed security certificate lifecycle and WAF configurations, reducing exposure from expired certificates and unauthorised web traffic.
- Administered Conditional Access and MFA policies in Microsoft Entra ID, onboarding new applications and enforcing Zero Trust access controls.
- Supported vulnerability management using Nessus and Pentera BAS, mapping findings to remediation plans and tracking progress against SLA targets.
- Contributed to IDS/IPS alert monitoring, firewall policy reviews and security awareness training programmes across the institution.

IT Engineer, Security, Quality and Infrastructure

February 2021 – March 2022

- Delivered IT security and infrastructure engineering across a cloud-first Software as a Service (SaaS) environment, implementing endpoint protection, identity controls, and network monitoring.
- Managed MDM and MAM policies, security hardening of cloud endpoints, and access control provisioning aligned to least-privilege principles.
- Supported security incident investigations, vulnerability remediation and IT quality assurance processes, contributing to ISO 27001 compliance activities.
- Administered email filtering, MFA deployment and SSO integrations for remote-first workforce.

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon EDR and NG-SIEM enterprise-wide, enabling full endpoint telemetry visibility and reducing alert noise through precision tuning.
- Rolled out Microsoft Defender for Endpoint, Identity and Microsoft 365 to 8,000 users, providing layered threat protection across the full Microsoft security stack.
- Implemented BeyondTrust PAM, eliminating uncontrolled privileged access and enabling auditable just-in-time session management.
- Redesigned Conditional Access and MFA policies in Microsoft Entra ID, hardening identity security and achieving measurable reduction in credential-based incidents.
- Led vulnerability management programme utilising Tenable.io, Nessus and Pentera BAS, systematically reducing critical and high findings across the estate.
- Automated SOAR playbooks for common incident types, reducing manual triage effort and improving mean time to respond (MTTR).
- Delivered security awareness training campaigns that measurably reduced phishing click-through rates across the organisation.

EDUCATION

- Master of Science (M.Sc.) Environmental and Resource Engineering

- Bachelor of Science (B.Sc.) Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
