

PROSPER AWUNI

Senior Security Engineer | Firewalls | Email Security | Azure Cloud | IAM/PAM | SIEM/SOAR | CISSP |
London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Security Engineer with over five years of broad, hands-on experience implementing and maintaining enterprise security tooling and systems across network, endpoint, identity and cloud domains. I have a proven track record managing firewalls, email security platforms, Identity and Access Management (IAM) and Privileged Access Management (PAM) systems, security certificates, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) in large, complex environments. I have deployed and operated CrowdStrike Falcon Endpoint Detection and Response (EDR) and Microsoft Defender at enterprise scale, and I bring strong experience in Azure cloud security, Microsoft Intune Mobile Device Management (MDM) and vulnerability management. I hold the Certified Information Systems Security Professional (CISSP) and Microsoft Certified Solutions Associate (MCSA) certifications, and I take pride in mentoring junior team members while maintaining a hands-on approach to security engineering. I thrive in small, collaborative security teams where I can make a direct, visible impact on the organisation's security posture.

CORE SKILLS AND TECHNICAL STACK

- **Firewall and Network Security:** Check Point Harmony firewall, IDS/IPS, network segmentation, WAF/DDoS principles, perimeter and internal security controls
- **Email Security:** Mimecast (anti-phishing, data loss prevention (DLP), targeted threat protection, impersonation defence)
- **Cloud Security:** Microsoft Azure, Azure Active Directory (Azure AD) / Entra ID, Conditional Access, Microsoft Defender for Cloud
- **Identity and Access Management (IAM):** Azure AD / Entra ID, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Group Policy
- **Privileged Access Management (PAM):** BeyondTrust (credential vaulting, session recording, just-in-time access)
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel (KQL), CrowdStrike Falcon NG-SIEM, SOAR playbook development
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, EDR, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE)
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Security Certificate Management:** SSL/TLS certificate lifecycle, renewal and deployment
- **Scripting and Automation:** PowerShell, SOAR playbooks
- **Frameworks:** NIST Cybersecurity Framework (CSF), ISO 27001, CIS Controls, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer — University of the Arts, London (UAL) *March 2025 – Present*

- Managed end-to-end security engineering across network, endpoint, identity and cloud infrastructure for an 8,000-user environment, implementing and maintaining a broad portfolio of security tools and systems
- Managed Check Point Harmony firewall policies, enforcing network segmentation, Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) rules, web filtering and perimeter controls to reduce the external attack surface

- Administered Mimecast email security platform, configuring anti-phishing policies, data loss prevention (DLP) rules, targeted threat protection and impersonation defences, protecting the organisation against email-borne attacks
- Deployed and managed Azure cloud security controls including Conditional Access policies, Entra ID, Multi-Factor Authentication (MFA) and Microsoft Defender for Cloud, maintaining a strong cloud security posture across Microsoft 365 and Azure tenants
- Implemented and operated BeyondTrust Privileged Access Management (PAM), governing privileged account lifecycle with credential vaulting, session recording and just-in-time access, reducing the risk of credential-based attacks on server and network infrastructure
- Managed Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies, enforcing device compliance standards and protecting corporate data across 8,000 corporate and bring-your-own-device (BYOD) endpoints
- Maintained security certificate lifecycle management, ensuring timely renewal and deployment of SSL/TLS certificates across web-facing and internal services
- Operated CrowdStrike Falcon Endpoint Detection and Response (EDR) and Microsoft Defender for Endpoint (MDE), building custom detections, tuning alerts and responding to endpoint-based threats
- Conducted vulnerability assessments using Tenable.io, Pentra BAS and AppCheck, tracking remediation to closure and reporting on patch posture to senior management
- Mentored junior security analysts in tooling, alert triage and incident response procedures, supporting team capability development

Cyber Security Analyst, Cyber Security and Identity — University of the Arts, London (UAL)

March 2022 – March 2025

- Delivered broad security engineering and operations support across network, endpoint, identity and cloud infrastructure for UAL's 8,000-user estate, gaining hands-on experience with a wide range of enterprise security tools
- Maintained Mimecast email security and administered Azure Active Directory (Azure AD), Conditional Access and Multi-Factor Authentication (MFA) for the 8,000-user directory
- Managed vulnerability scanning and remediation tracking using Tenable.io and Nessus, coordinating with system owners to close identified gaps
- Supported deployment and management of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), integrating telemetry into Microsoft Sentinel
- Developed Kusto Query Language (KQL) detection rules and Security Orchestration, Automation and Response (SOAR) playbooks within Microsoft Sentinel to improve alert handling efficiency
- Administered identity and access management (IAM) controls, supporting onboarding and offboarding processes, access reviews and Active Directory Group Policy management
- Managed security certificate renewals and supported the maintenance of SSL/TLS certificates across web-facing services

IT Engineer: Security, Quality and Infrastructure — HICX Solutions Ltd (SaaS/FinTech)

February 2021 – March 2022

- Delivered IT security engineering, quality assurance and infrastructure management for a Software as a Service (SaaS) and Financial Technology (FinTech) platform serving global enterprise clients
- Managed endpoint security, network monitoring and vulnerability scanning tools to maintain security standards across the corporate environment and cloud-hosted platform
- Maintained security policies aligned to ISO 27001 and managed identity and access controls through Active Directory and user lifecycle processes
- Managed IT infrastructure including server, networking and end-user systems, liaising with DevOps teams to embed security requirements across engineering and operational processes

KEY ACHIEVEMENTS

- Deployed and optimised CrowdStrike Falcon Endpoint Detection and Response (EDR) across UAL's 8,000-user estate, achieving full endpoint telemetry visibility and building custom detections to reduce threat dwell time

- Implemented BeyondTrust Privileged Access Management (PAM), eliminating unmanaged administrative credentials across UAL infrastructure and materially strengthening the privileged access security posture
- Deployed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across the 8,000-user environment, centralising telemetry into Microsoft Sentinel for unified monitoring
- Implemented Security Orchestration, Automation and Response (SOAR) playbooks in Microsoft Sentinel, automating phishing triage and account compromise response workflows and significantly reducing analyst Mean Time to Respond (MTTR)
- Led UAL's successful recertification against Cyber Essentials Plus, mapping security controls across network, endpoint, identity and cloud systems and driving remediation of identified gaps
- Built detection use cases and threat hunting playbooks aligned to MITRE ATT&CK within Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, improving the organisation's ability to detect sophisticated threats

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
