

PROSPER AWUNI

Security Monitoring Engineer | SIEM Lifecycle Management | Detection Engineering | Microsoft Sentinel | CrowdStrike NG-SIEM | SOAR | Threat Intelligence

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Security Monitoring Engineer and Senior Cyber Security professional with over five years of experience managing, developing and continuously improving Security Information and Event Management (SIEM) solutions in large, complex enterprise environments. I have deep expertise in the full SIEM lifecycle: from data connector onboarding and log source integration, through detection use case design and analytics rule development, to Security Orchestration, Automation and Response (SOAR) playbook automation and threat intelligence enrichment. I have hands-on proficiency with Microsoft Sentinel using Kusto Query Language (KQL) and CrowdStrike Falcon Next-Generation Security Information and Event Management (NG-SIEM), and I have led detection engineering programmes aligned to MITRE ATT&CK Tactics, Techniques and Procedures (TTPs). I hold the Certified Information Systems Security Professional (CISSP) certification and bring a structured, continuous-improvement mindset to monitoring system development, with experience in regulated environments and strong communication skills for engaging technical and business stakeholders alike.

CORE SKILLS AND TECHNICAL STACK

- **Security Information and Event Management (SIEM) Lifecycle:** Data onboarding, analytics rule development, use case design, continuous optimisation, dashboard and reporting build-out
- **SIEM Platforms:** Microsoft Sentinel (KQL), CrowdStrike Falcon NG-SIEM, Splunk/SPL (moderate)
- **Detection Engineering:** Custom detection rule creation, MITRE ATT&CK mapping, alert tuning, false-positive reduction, threat hunting
- **Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel Playbooks, Logic Apps, PowerShell automation, incident workflow design
- **Threat Intelligence Integration:** Indicator of Compromise (IOC) enrichment, Cyber Threat Intelligence (CTI) feed ingestion, threat actor Tactics, Techniques and Procedures (TTP) mapping
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, EDR, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE)
- **Microsoft Security Stack:** Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender, Azure Active Directory (Azure AD) / Entra ID
- **Log Sources and Data Integration:** Endpoint, firewall, identity platform, cloud services and email security log onboarding and normalisation
- **Incident Response (IR):** NIST 800-61, alert-to-investigation lifecycle, post-incident review
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Scripting and Automation:** PowerShell, KQL, SOAR playbook development
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer — University of the Arts, London (UAL) *March 2025 – Present*

- Managed the full lifecycle of Microsoft Sentinel Security Information and Event Management (SIEM), including onboarding data connectors from endpoints, firewalls, identity platforms, email security and cloud services, normalising log sources into the centralised monitoring platform
- Designed and implemented over 40 custom detection use cases and analytics rules within Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, aligned to MITRE ATT&CK TTPs, improving threat detection coverage and reducing false-positive rates through continuous tuning

- Integrated Cyber Threat Intelligence (CTI) feeds and Indicator of Compromise (IOC) data into the SIEM platform, automating IOC enrichment within alert workflows and improving proactive detection of emerging threats targeting the organisation
- Designed and deployed Security Orchestration, Automation and Response (SOAR) playbooks using Microsoft Sentinel Logic Apps and PowerShell, automating incident creation, phishing triage, account isolation and high-volume alert response workflows, significantly reducing analyst Mean Time to Respond (MTTR)
- Built Kusto Query Language (KQL) hunting queries, workbooks and scheduled analytics rules for advanced threat hunting across Microsoft 365 and Azure Active Directory (Azure AD) environments, identifying adversary persistence and lateral movement activity
- Managed CrowdStrike Falcon Endpoint Detection and Response (EDR) across an 8,000-user estate, creating custom threat detections and conducting proactive threat hunts to identify and disrupt adversary Tactics, Techniques and Procedures (TTPs)
- Led incident response engagements in line with NIST 800-61, producing post-incident reports and translating technical findings into risk-appropriate recommendations for senior stakeholders
- Maintained and reported on security monitoring effectiveness via dashboards and KPIs, presenting SIEM health, coverage and incident trends to the Chief Information Security Officer (CISO) and governance committees

Cyber Security Analyst, Cyber Security and Identity — University of the Arts, London (UAL)

March 2022 – March 2025

- Operated and maintained the Microsoft Sentinel SIEM platform, developing Kusto Query Language (KQL) detection rules, scheduled analytics queries and workbooks to improve threat visibility across the Microsoft 365 and Azure environment
- Built and tuned detection use cases across CrowdStrike Falcon and Microsoft Sentinel, mapping alerts to MITRE ATT&CK tactics and techniques to provide structured threat intelligence context during incidents
- Onboarded additional log sources into Microsoft Sentinel, extending coverage to new endpoint classes, cloud applications and network infrastructure, improving monitoring breadth and data fidelity
- Supported the design and deployment of Security Orchestration, Automation and Response (SOAR) workflows, reducing repetitive manual triage tasks for the Security Operations Centre (SOC) team
- Conducted vulnerability management using Tenable.io and Nessus, integrating findings into the SIEM risk context and supporting risk-prioritised remediation tracking
- Investigated security alerts and incidents, producing detailed incident timelines and applying NIST 800-61 procedures to guide containment, eradication and recovery

IT Engineer: Security, Quality and Infrastructure — HICX Solutions Ltd (SaaS/FinTech)

February 2021 – March 2022

- Delivered IT security, infrastructure management and quality assurance for a Software as a Service (SaaS) and Financial Technology (FinTech) platform, maintaining security monitoring and network event logging
- Managed endpoint security tools and network monitoring capabilities, analysing alerts and escalating incidents appropriately to maintain the security posture of the corporate environment
- Implemented and maintained ISO 27001-aligned security policies, supporting internal audit and client-facing compliance assurance processes
- Administered identity and access management (IAM) controls using Active Directory, enforcing least-privilege access and conducting regular access reviews

KEY ACHIEVEMENTS

- Built a library of 40+ custom detection use cases in Microsoft Sentinel and CrowdStrike Falcon NG-SIEM aligned to MITRE ATT&CK, materially improving Security Operations Centre (SOC) detection coverage and reducing Mean Time to Detect (MTTD) for high-priority threat scenarios
- Designed and deployed Security Orchestration, Automation and Response (SOAR) playbooks in Microsoft Sentinel, automating phishing triage, account compromise response and high-volume alert workflows, significantly reducing Mean Time to Respond (MTTR)
- Integrated Cyber Threat Intelligence (CTI) feeds into the SIEM platform, automating Indicator of Compromise (IOC) enrichment and enabling proactive blocking of emerging threats before they reached

end users

- Deployed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across the 8,000-user UAL environment, onboarding all telemetry into Microsoft Sentinel for centralised monitoring
- Deployed and optimised CrowdStrike Falcon EDR across UAL's 8,000-user estate, achieving full endpoint telemetry visibility and building custom detections that reduced threat dwell time
- Led UAL's successful Cyber Essentials Plus recertification, validating the effectiveness of implemented monitoring and detection controls against the accreditation standard

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
