

PROSPER AWUNI

Senior Security Engineer | Detection Engineering | SIEM | EDR | SOAR | MITRE ATT&CK | Cloud Security | Azure/M365

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Security Engineer with over five years of experience designing, deploying and continuously improving Security Operations Centre (SOC) technologies, including Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR) and Security Orchestration, Automation and Response (SOAR) platforms. I specialise in detection engineering, having built and maintained large libraries of detection use cases and correlation rules aligned to MITRE ATT&CK Tactics, Techniques and Procedures (TTPs), and I am proficient in developing automation workflows to streamline incident response and reduce analyst workload. My technical stack spans Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike Falcon NG-SIEM, Microsoft 365 (M365) and Azure cloud security, with strong capability in PowerShell scripting and SOAR automation. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a continuous improvement mindset, excellent problem-solving skills and a genuine passion for keeping pace with the evolving threat landscape.

CORE SKILLS AND TECHNICAL STACK

- **Detection Engineering:** Use case design, correlation rule development, MITRE ATT&CK mapping, alert tuning, false-positive reduction, threat hunting
- **Security Information and Event Management (SIEM):** Microsoft Sentinel (KQL), CrowdStrike Falcon NG-SIEM, Splunk/SPL (moderate); full lifecycle management from data onboarding to continuous optimisation
- **Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel Playbooks (Logic Apps), PowerShell, automated incident workflow design and integration
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, EDR, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE)
- **Cloud Security:** Microsoft Azure, Microsoft 365 (M365), Azure Active Directory (Azure AD) / Entra ID, Conditional Access, Microsoft Defender for Cloud
- **Threat Intelligence:** Indicator of Compromise (IOC) enrichment, Cyber Threat Intelligence (CTI) feed integration, MITRE ATT&CK TTP profiling
- **Log Source Integration:** Endpoint, network, identity, email security and cloud service log onboarding and normalisation
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; risk-based prioritisation and remediation tracking
- **Identity and Access Management (IAM):** Azure AD / Entra ID, MFA, SSO, BeyondTrust Privileged Access Management (PAM)
- **Scripting and Automation:** PowerShell, KQL; Infrastructure-as-Code principles (Azure Bicep, ARM templates awareness)
- **Incident Response (IR):** NIST 800-61, containment, eradication and recovery workflows
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer — University of the Arts, London (UAL) *March 2025 – Present*

- Designed, deployed and continuously improved Security Operations Centre (SOC) technologies including Microsoft Sentinel Security Information and Event Management (SIEM), CrowdStrike Falcon Endpoint Detection and Response (EDR) and Security Orchestration, Automation and Response (SOAR) platforms across an 8,000-user estate

- Developed and optimised over 40 detection use cases and correlation rules within Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, aligned to MITRE ATT&CK Tactics, Techniques and Procedures (TTPs), improving detection coverage and materially reducing false-positive alert rates through iterative tuning
- Built and maintained SOAR automation workflows using Microsoft Sentinel Playbooks (Logic Apps) and PowerShell, automating phishing triage, account compromise response and high-volume alert handling, significantly reducing analyst Mean Time to Respond (MTTR)
- Integrated Cyber Threat Intelligence (CTI) feeds and Indicator of Compromise (IOC) data into the SIEM platform, enabling automated enrichment and proactive blocking of emerging threats before they reached end users
- Onboarded and normalised log sources from endpoints, firewalls, Azure Active Directory (Azure AD) / Entra ID, Mimecast email security and Microsoft 365 cloud services into Microsoft Sentinel, extending detection coverage across the full technology estate
- Conducted proactive threat hunting using Kusto Query Language (KQL) in Microsoft Sentinel and CrowdStrike Falcon Insight, identifying adversary persistence, lateral movement and data exfiltration techniques before they caused material impact
- Managed Azure cloud security controls including Conditional Access, Entra ID, Multi-Factor Authentication (MFA) and Microsoft Defender for Cloud, maintaining a strong cloud security posture across Microsoft 365 and Azure environments
- Deployed vulnerability management using Pentra Breach and Attack Simulation (BAS), Tenable.io and AppCheck, tracking findings to remediation and integrating vulnerability context into SIEM detection logic
- Led incident response engagements in accordance with NIST 800-61, coordinating containment, eradication and recovery, and producing post-incident reports with actionable improvements to detection and response playbooks

Cyber Security Analyst, Cyber Security and Identity — University of the Arts, London (UAL)

March 2022 – March 2025

- Operated and maintained Microsoft Sentinel SIEM, developing Kusto Query Language (KQL) detection rules, scheduled analytics and hunting queries to improve threat visibility across the Microsoft 365 and Azure cloud environment
- Built and tuned detection rules across CrowdStrike Falcon and Microsoft Sentinel, mapping detected activity to MITRE ATT&CK TTPs to provide structured threat intelligence context during investigation
- Developed Security Orchestration, Automation and Response (SOAR) workflows within Microsoft Sentinel to automate repetitive alert triage tasks and accelerate incident response workflows
- Managed vulnerability scanning using Tenable.io and Nessus, coordinating risk-prioritised remediation with system owners and maintaining compliance reporting dashboards
- Administered Azure Active Directory (Azure AD), Conditional Access and Multi-Factor Authentication (MFA) for 8,000 users, maintaining a strong identity security posture
- Conducted Security Operations Centre (SOC) tier 2 and tier 3 alert triage and incident investigations, applying NIST 800-61 procedures and producing post-incident reviews with improvement recommendations

IT Engineer: Security, Quality and Infrastructure — HICX Solutions Ltd (SaaS/FinTech)

February 2021 – March 2022

- Delivered IT security engineering, infrastructure management and quality assurance for a Software as a Service (SaaS) and Financial Technology (FinTech) platform, with responsibility for endpoint security, network monitoring and cloud security controls
- Managed vulnerability scanning tools and coordinated remediation activities to maintain security standards across the corporate environment and hosted SaaS platform
- Implemented and maintained security policies aligned to ISO 27001, supporting internal audit processes and client-facing compliance assurance reviews
- Administered identity and access management (IAM) controls through Active Directory, enforcing least-privilege access and supporting user lifecycle management processes

KEY ACHIEVEMENTS

- Built a library of 40+ custom detection use cases in Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, aligned to MITRE ATT&CK TTPs, materially improving SOC detection coverage and reducing Mean Time to Detect (MTTD) for high-priority threats
- Designed and deployed Security Orchestration, Automation and Response (SOAR) playbooks in Microsoft Sentinel, automating phishing triage, account compromise response and high-volume alert handling workflows, significantly reducing Mean Time to Respond (MTTR)
- Deployed and optimised CrowdStrike Falcon EDR across UAL's 8,000-user estate, achieving full endpoint telemetry visibility and building custom threat detections that reduced threat dwell time
- Deployed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across the 8,000-user environment, onboarding all telemetry into Microsoft Sentinel for centralised, unified SOC monitoring
- Implemented BeyondTrust Privileged Access Management (PAM), securing privileged account lifecycle and materially reducing the risk of credential-based lateral movement across the infrastructure
- Led UAL's successful Cyber Essentials Plus recertification, validating the effectiveness of SIEM, EDR and vulnerability management controls against the independent assessment standard

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
