

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | PAM | Identity Security | London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience designing, implementing and operating enterprise security infrastructure across endpoint, network, identity and cloud domains. I hold expert-level proficiency in CrowdStrike Falcon Endpoint Detection and Response (EDR), having deployed and managed the full Falcon suite including Prevent, Insight and Discover across large-scale environments. I have a strong track record managing Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, including Microsoft Sentinel with Kusto Query Language (KQL), and I bring extensive experience with Privileged Access Management (PAM), email security, Mobile Device Management (MDM), vulnerability management and identity platforms. I hold the Certified Information Systems Security Professional (CISSP) certification and take a methodical, risk-aware approach to securing critical infrastructure, with proven ability to engage technical and non-technical stakeholders at all levels.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, EDR, Insight, Discover, Next-Generation Security Information and Event Management (NG-SIEM)) - Expert
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel, KQL, alert triage, detection engineering, playbook automation
- **Microsoft Security Stack:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **Identity and Access Management (IAM):** Azure Active Directory (Azure AD) / Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust
- **Email Security:** Mimecast (anti-phishing, data loss prevention (DLP), targeted threat protection)
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Firewall and Network Security:** Check Point Harmony, IDS/IPS, network segmentation, WAF/DDoS principles
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Incident Response (IR):** NIST 800-61, MITRE ATT&CK framework
- **Scripting and Automation:** PowerShell, SOAR playbook development
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer — University of the Arts, London (UAL) *March 2025 – Present*

- Managed the full CrowdStrike Falcon suite (EDR, Prevent, Insight, Discover and NG-SIEM) across an 8,000-user estate, building custom threat detections, tuning alert thresholds and conducting proactive threat hunting to minimise dwell time
- Administered Mimecast email security gateway, configuring data loss prevention (DLP), spam and phishing filtering, targeted threat protection and email impersonation policies to protect the organisation against email-borne threats
- Managed Microsoft Azure Active Directory (Azure AD) / Entra ID, Conditional Access policies, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) integrations across cloud and on-premises applications for 8,000 users
- Deployed and operated BeyondTrust Privileged Access Management (PAM) to govern privileged account lifecycle, credential vaulting, session recording and just-in-time access, reducing the attack surface associated with over-privileged accounts

- Managed Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing device compliance policies and corporate data protection standards across corporate-owned and bring-your-own-device (BYOD) endpoints
- Conducted vulnerability assessments using Tenable.io, Pentra BAS and AppCheck; tracked findings through to remediation in coordination with infrastructure and application teams
- Managed Check Point Harmony firewall and endpoint policies; maintained Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) rules and enforced network segmentation to limit lateral movement
- Built and maintained Security Orchestration, Automation and Response (SOAR) playbooks in Microsoft Sentinel, automating phishing triage, account compromise response and high-volume alert handling workflows
- Responded to security incidents following NIST 800-61, managing containment, eradication and recovery while coordinating with IT, Legal and senior leadership stakeholders
- Delivered security awareness training and produced monthly security metrics reports for senior management

Cyber Security Analyst, Cyber Security and Identity — University of the Arts, London (UAL)

March 2022 – March 2025

- Performed Security Operations Centre (SOC) tier 2 and tier 3 analyst duties: alert investigation, triage and escalation across Microsoft Sentinel, CrowdStrike Falcon and M365 Defender, handling a broad range of endpoint, identity and cloud-based threats
- Managed vulnerability scanning programmes using Tenable.io and Nessus, prioritising findings by risk severity and coordinating remediation with system owners across the university
- Administered Azure Active Directory (Azure AD), Conditional Access and MFA settings, supporting onboarding and offboarding of 8,000 staff and student accounts
- Maintained Mimecast email security platform, investigating phishing campaigns, tuning detection policies and managing allow and block lists
- Developed KQL queries and workbooks in Microsoft Sentinel to improve detection coverage and support compliance reporting across the Microsoft 365 environment
- Supported the deployment and configuration of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) as part of the organisation-wide security platform migration
- Contributed to incident response investigations, producing post-incident reviews and lessons-learned reports in line with NIST 800-61 procedures

IT Engineer: Security, Quality and Infrastructure — HICX Solutions Ltd (SaaS/FinTech)

February 2021 – March 2022

- Delivered IT security, infrastructure management and quality assurance for a Software as a Service (SaaS) and Financial Technology (FinTech) platform serving global enterprise clients
- Managed endpoint security tooling, network monitoring and vulnerability scanning to protect the corporate environment and the hosted SaaS platform
- Implemented and maintained security policies aligned to ISO 27001, supporting internal audit processes and external compliance reviews
- Administered identity and access management (IAM) controls, managing Active Directory, user provisioning and de-provisioning in line with least-privilege principles
- Provided IT infrastructure support across server, networking and end-user systems, collaborating with DevOps and engineering teams to embed security requirements into operational processes

KEY ACHIEVEMENTS

- Deployed and optimised CrowdStrike Falcon EDR across UAL's 8,000-user estate, achieving full endpoint telemetry visibility and measurably reducing threat dwell time through custom detection and automated response workflows
- Implemented BeyondTrust Privileged Access Management (PAM), eliminating unmanaged administrative credentials across UAL infrastructure and strengthening the organisation's zero-trust security posture
- Deployed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across the 8,000-user UAL environment, integrating all telemetry into Microsoft Sentinel for

unified threat monitoring

- Built a library of custom detection use cases within Microsoft Sentinel and CrowdStrike Falcon NG-SIEM aligned to MITRE ATT&CK tactics, techniques and procedures (TTPs), supporting proactive threat hunting and reducing Mean Time to Detect (MTTD)
- Implemented Security Orchestration, Automation and Response (SOAR) playbooks within Microsoft Sentinel, automating phishing triage and account compromise response workflows and significantly reducing analyst mean time to respond (MTTR)
- Led UAL's successful recertification against Cyber Essentials Plus, mapping controls to the standard and remediating identified gaps ahead of the independent assessment

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
