

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Vulnerability Management | PAM

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Cyber Security Engineer with over five years of hands-on experience delivering enterprise security operations across complex multi-platform environments. I have extensive expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platform management, and the full security technology stack required of a small, high-performing IT security team. I am experienced in overseeing Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection, email and web security gateways via Mimecast, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) administration, Mobile Device Management (MDM) and Mobile Application Management (MAM), vulnerability scanning and remediation, Intrusion Detection and Prevention Systems (IDS/IPS), and Privileged Access Management (PAM) via BeyondTrust. I am equally comfortable engaging in out-of-hours incident response and contributing to ad-hoc security projects, and I bring the breadth of experience to operate effectively as a core member of a focused security team reporting to an IT Security Officer.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) and SIEM/SOAR:** CrowdStrike Falcon EDR, Prevent (Next-Generation Anti-Virus (NGAV)), Insight (Threat Hunting), Discover, Next-Gen SIEM; Microsoft Sentinel (KQL); Splunk (SPL); SOAR playbook development and automation
- **Email, Web, and Gateway Security:** Mimecast email security and web gateway; Check Point Harmony Endpoint; Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection
- **Identity and Access Management (IAM):** Microsoft Entra Identity (Azure Active Directory (AD) / Group Policy); Conditional Access; Multi-Factor Authentication (MFA); Single Sign-On (SSO); BeyondTrust Privileged Access Management (PAM)
- **Endpoint and Device Management:** Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM); Tanium; CrowdStrike Falcon Discover
- **Vulnerability Management:** Tenable.io; Pentera Breach and Attack Simulation (BAS); AppCheck; Nessus; full remediation lifecycle management
- **Incident Response and Threat Hunting:** NIST 800-61 Incident Response framework; MITRE ATT&CK framework; CrowdStrike Falcon Insight proactive threat hunting; IDS/IPS monitoring and response
- **Security Frameworks:** NIST Cybersecurity Framework (CSF); CIS Controls; ISO 27001; Cyber Essentials Plus; MITRE ATT&CK
- **Scripting and Automation:** PowerShell scripting; SOAR automation workflow design

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

Senior Cyber Security Analyst / Engineer

March 2025 - Present

- Oversee the SIEM and SOAR platform environment, managing alert triage and response workflows across CrowdStrike Falcon Next-Gen SIEM and Microsoft Sentinel, ensuring consistent and timely Endpoint Detection and Response (EDR) alert handling.
- Manage CrowdStrike Falcon EDR, Prevent (Next-Generation Anti-Virus (NGAV)), Insight (threat hunting), and Discover modules, overseeing policy configuration, sensor deployment, and ongoing tuning across the enterprise endpoint estate.
- Administer Mimecast email security gateway and web filtering, managing inbound and outbound email policies, anti-phishing rules, and user-reported phishing workflows.
- Manage Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection for externally facing systems, reviewing and updating rulesets in response to emerging threat intelligence.

- Administer Multi-Factor Authentication (MFA) and Single Sign-On (SSO) for the enterprise via Microsoft Entra Identity (Azure Active Directory), enforcing Conditional Access policies aligned with Zero Trust principles.
- Manage Mobile Device Management (MDM) and Mobile Application Management (MAM) through Microsoft Intune, maintaining device compliance policies across managed and Bring Your Own Device (BYOD) endpoints.
- Run vulnerability scanning and remediation cycles using Tenable.io, Pentera Breach and Attack Simulation (BAS), and AppCheck, tracking remediation to closure across server, workstation, and cloud resources.
- Manage Intrusion Detection and Prevention System (IDS/IPS) monitoring, reviewing anomalous network activity alerts and escalating confirmed incidents for response.
- Administer BeyondTrust Privileged Access Management (PAM), controlling and monitoring privileged account activity across critical systems and enforcing least-privilege access policies.
- Lead security awareness training delivery and phishing simulation campaigns, working with the broader IT team to reduce the organisation's human risk exposure.
- Remediate penetration testing findings, triaging reported vulnerabilities and tracking remediation progress to completion within agreed Service Level Agreements (SLAs).
- Contribute to ad-hoc security projects including security architecture reviews, third-party risk assessments, and policy updates, ensuring alignment with NIST Cybersecurity Framework (CSF) and Cyber Essentials Plus requirements.

University of the Arts, London (UAL)

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Supported deployment of CrowdStrike Falcon Prevent (Next-Generation Anti-Virus (NGAV)) and Endpoint Detection and Response (EDR) across the enterprise, assisting with policy configuration, exclusion management, and ongoing tuning.
- Monitored and responded to SIEM and EDR alert queues, escalating confirmed incidents and supporting Tier 2 incident handling activities including containment and eradication.
- Supported administration of Multi-Factor Authentication (MFA) and Single Sign-On (SSO) via Microsoft Entra Identity (Azure Active Directory), investigating identity-related incidents and account compromise events.
- Assisted in managing Mimecast email security platform, reviewing quarantine queues, investigating phishing reports, and updating email security policies.
- Contributed to vulnerability scanning cycles using Tenable.io and Nessus, supporting remediation tracking and producing reporting for IT management on patch compliance.
- Supported Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), ensuring device enrolment and compliance across the estate.
- Contributed to the MITRE ATT&CK-mapped detection engineering process, assisting in writing and refining SIEM correlation rules and custom Endpoint Detection and Response (EDR) indicators.
- Supported out-of-hours incident response as part of the on-call rota, handling alerts and escalations outside of standard business hours.

HICX Solutions Ltd (Software as a Service / FinTech)

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed endpoint security, firewall configurations, and network monitoring across a Software as a Service (SaaS) FinTech infrastructure, covering both cloud and on-premise environments.
- Administered Azure Active Directory identity and access management, supporting Multi-Factor Authentication (MFA) provisioning and access reviews across the organisation.
- Maintained patching cycles and vulnerability remediation across Windows servers and workstations, ensuring compliance with security standards.
- Managed Mobile Device Management (MDM) provisioning via Microsoft Intune, enforcing device enrolment and Bring Your Own Device (BYOD) policies.
- Supported email gateway security configuration and managed Distributed Denial of Service (DDoS) monitoring for internet-facing services.
- Contributed to IT security documentation and quality reviews aligned with ISO 27001 principles, supporting internal and external audit requirements.

KEY ACHIEVEMENTS

- Expert-level deployment and management of CrowdStrike Falcon EDR, Next-Gen SIEM, Prevent, Insight, and Discover modules across an enterprise endpoint estate, delivering comprehensive endpoint visibility and threat containment capability.
- Deployed and managed Microsoft Defender for Endpoint (MDE), Defender for Identity (MDI), and Microsoft 365 Defender across 8,000+ users, building integrated XDR (Extended Detection and Response) coverage across identity, endpoint, and cloud workloads.
- Implemented BeyondTrust Privileged Access Management (PAM) solution, significantly reducing attack surface associated with unmanaged administrative credentials across critical infrastructure.
- Built and operationalised SOAR (Security Orchestration, Automation and Response) playbooks that automated common alert triage tasks, reducing mean analyst handling time and improving consistency of response.
- Led the organisation's Cyber Essentials Plus certification, coordinating evidence submission and control remediation across network security, patching, access control, and malware protection domains.
- Built a vulnerability exposure management programme using Tenable.io and Pentera Breach and Attack Simulation (BAS), achieving systematic tracking of remediation from discovery to verified closure across cloud and on-premise estates.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
